Are you an individual or representing an organisation?	Individual
Draft public exhibition regulation	
Do you have any other comments on the draft public exhibition regulation?	Yes
If yes, please provide your comments.	<p>I am against the amendment to the regulation to allow Non Duly qualified person (DQP) to Install or re-install a meter Reference number 16.</p> <p>A qualified meter installer have undergone and completed official training to install meters.</p> <p>I am a qualified meter installer and a qualified Boilermaker. I have personally had experience with people that have installed their own meters prior to this legislation. And quite often I come across sites where the meter is installed incorrectly, but the person responsible for the install will argue that he has installed it correctly.</p> <p>I am sure that this change will cause conflict between the Meter owner and the DQP when an installation cant be validated due to the meter having been installed incorrectly. This will result in an extra cost to the farmer to reinstall it, and unrecoverable cost to the DQP for travel and time to the site.</p>
