

Rules summary sheet: Baradine Creek Water Source

Water Sharing Plan for the Namoi and Peel Unregulated Rivers Water Sources 2012

Plan details

| | |
|---------------------------|--|
| Water sharing plan | Namoi and Peel Unregulated Rivers Water Sources 2012 |
| Plan commencement | 4 October 2012 |
| Term of the plan | 10 years |

Important: This factsheet summarises the rules contained in the *Water Sharing Plan for the Namoi and Peel Unregulated Rivers Water Sources 2012*. It is intended as a guide only. Approvals and licences also contain conditions that holders must comply with. You can access this information from your 'Statement of Approval' or 'Statement of Conditions' or alternatively via <https://waterregister.waternsw.com.au/water-register-frame>.

Access Rules

Access rules for rivers and creeks

| | |
|-----------------|--|
| Cease to pump | <p>Pumping is not permitted from natural pools when the water level in the pool is lower than its full capacity</p> <p>Note: Full capacity can be approximated by the pool water level at the point where there is no visible flow into and out of that pool</p> <p>Note: Natural pools include in-river pools found within the channels of rivers and creeks and off-river pools located on flood runners, floodplains and effluents e.g. lakes, lagoons and billabongs.</p> <p>Note: For pump sites not within a natural pool, the cease to pump rule is when there is no visible flow at the pump site</p> |
| Reference point | Individual natural pool |

Access rules for natural off-river pools

| | |
|---------------|---|
| Cease to pump | <p>Pumping is not permitted when the water level in that natural off-river pool is lower than its full capacity.</p> <p>Note: 'Full capacity' can be approximated by the pool water level at the point where there is no visible flow into and out of that pool.</p> <p>Note: Off-river pools include those natural pools located on flood runners or floodplains, or an effluent that only commences to flow during high</p> |
|---------------|---|

| | |
|-----------------|-----------------------------------|
| Reference point | Individual natural off-river pool |
|-----------------|-----------------------------------|

Notes:

1. These access rules do not apply if the existing *Water Act 1912* entitlement had more stringent access licence conditions. These existing conditions will be carried forward under the plan and are included in clause 47(7) and the associated Appendix 3.
2. These access rules do not apply to:
 - Local Water Utilities or unregulated (town water supply) access licences
 - Stock and Domestic (Domestic) licences
 - Water taken under a licence listed under clause 47(18) and the associated clause 1 of Schedule 3
 - The taking of water from existing dams. Any existing licence conditions associated with a dam will be carried forward under the plan.
 - For the first 5 years of the plan to water taken for stock watering by stock and domestic access licences

Trading rules

Turrigulla and Gil Gil Creeks trading zone

| | |
|--------------------------|---|
| Into water source | No trade of additional water entitlement into this area of the Water Source. The cap on entitlement is 19,023ML, and the entitlement in this area of the Water Source at the time of assessment was 19,023ML. |
|--------------------------|---|

| | |
|----------------------------|--|
| Within water source | Trades are permitted, subject to assessment but not into natural off-river pools |
|----------------------------|--|

Namoi effluents and Barwon trading zone

| | |
|--------------------------|---|
| Into water source | No trade of additional water entitlement into this area of the Water Source. The cap on entitlement is 47ML, and the entitlement in this area of the Water Source at the time of assessment was 47ML. |
|--------------------------|---|

| | |
|----------------------------|--|
| Within water source | Trades are permitted, subject to assessment but not into natural off-river pools |
|----------------------------|--|

Baradine Creek and tributaries trading zone

| | |
|--------------------------|--|
| Into water source | Allows trade of additional water entitlement into this area of the Water Source from a water source with higher ecological value. The cap on entitlement is 1,326ML, and the entitlement in this area of the Water Source at the time of assessment was 276ML. |
|--------------------------|--|

| | |
|----------------------------|--|
| Within water source | Trades are permitted, subject to assessment but not into natural off-river pools |
|----------------------------|--|

Rules summary sheet: Eulah Creek Water Source

Water Sharing Plan for the Namoi and Peel Unregulated Rivers Water Sources 2012

Plan details

| | |
|---------------------------|--|
| Water sharing plan | Namoi and Peel Unregulated Rivers Water Sources 2012 |
| Plan commencement | 4 October 2012 |
| Term of the plan | 10 years |

Important: This factsheet summarises the rules contained in the *Water Sharing Plan for the Namoi and Peel Unregulated Rivers Water Sources 2012*. It is intended as a guide only. Approvals and licences also contain conditions that holders must comply with. You can access this information from your 'Statement of Approval' or 'Statement of Conditions' or alternatively via <https://waterregister.watersw.com.au/water-register-frame>.

Access Rules

| Access rules for rivers and creeks | |
|------------------------------------|--|
| Cease to pump | <p>Pumping is not permitted from natural pools when the water level in the pool is lower than its full capacity.</p> <p>Note: Full capacity can be approximated by the pool water level at the point where there is no visible flow into and out of that pool</p> <p>Note: Natural pools include in-river pools found within the channels of rivers and creeks and off-river pools located on flood runners, floodplains and effluents e.g. lakes, lagoons and billabongs.</p> <p>Note: For pump sites not within a natural pool, the cease to pump rule is when there is no visible flow at the pump site.</p> |
| Reference point | Individual natural pool |

Notes:

1. These access rules do not apply if the existing *Water Act 1912* entitlement had more stringent access licence conditions. These existing conditions will be carried forward under the plan and are included in clause 47(7) and the associated Appendix 3.
2. These access rules do not apply to:
 - Local Water Utilities or unregulated (town water supply) access licences
 - Stock and Domestic (Domestic) licences
 - Water taken under a licence listed under clause 47(18) and the associated clause 1 of Schedule 3
 - The taking of water from existing dams. Any existing licence conditions associated with a dam will be carried forward under the plan.
 - For the first 5 years of the plan to water taken for stock watering by stock and domestic access licences

Trading rules

| Trade type | Rules |
|---------------------|---|
| Into water source | Allows trade of additional water entitlement into the Water Source from a water source with higher ecological value. The cap on entitlement is 4,704ML, and the entitlement in the Water Source at the time of assessment was 3,894ML. Trades not permitted onto natural off-river pools. |
| Within water source | Trades are permitted, subject to assessment but not into natural off-river pools. |

Important: This factsheet summarises the rules contained in the *Water Sharing Plan for the Namoi and Peel Unregulated Rivers Water Sources 2012*. It is intended as a guide only. Approvals and licences also contain conditions that holders must comply with. You can access this information from your 'Statement of Approval' or 'Statement of Conditions' or alternatively via <https://waterregister.waternsw.com.au/water-register-frame>.

Access Rules

| Access rules for rivers and creeks | |
|------------------------------------|---|
| Cease to pump | <p>Pumping is not permitted from natural pools when the water level in the pool is lower than its full capacity.</p> <p>Note: 'Full capacity' can be approximated by the pool water level at the point where there is no visible flow into and out of that pool</p> <p>Note: Natural pools include in-river pools found within the channels of rivers and creeks and off-river pools located on flood runners, floodplains and effluents e.g. lakes, lagoons and billabongs.</p> <p>Note: For pump sites not within a natural pool, the cease to pump rule is when there is no visible flow at the pump site</p> |
| Reference point | Individual natural pool |

Notes:

1. These access rules do not apply if the existing *Water Act 1912* entitlement had more stringent access licence conditions. These existing conditions will be carried forward under the plan and are included in clause 47(7) and the associated Appendix 3.
2. These access rules do not apply to:
 - Local Water Utilities or unregulated (town water supply) access licences
 - Stock and Domestic (Domestic) licences
 - Water taken under a licence listed under clause 47(18) and the associated clause 1 of Schedule 3
 - The taking of water from existing dams. Any existing licence conditions associated with a dam will be carried forward under the plan.
 - For the first 5 years of the plan to water taken for stock watering by stock and domestic access licences

Trading rules

| Trade type | Rules |
|---------------------|---|
| Into water source | No trade of additional water entitlement into the Water Source. The cap on entitlement is 1,479ML, and the entitlement in the Water Source at the time of assessment was 1,479ML. Trades not permitted into natural off-river pools |
| Within water source | Trades are permitted, subject to assessment but not into natural off-river pools. |

Rules summary sheet: Upper Manilla Water Source

Water Sharing Plan for the Namoi and Peel Unregulated Rivers Water Sources 2012

Plan details

| | |
|---------------------------|--|
| Water sharing plan | Namoi and Peel Unregulated Rivers Water Sources 2012 |
| Plan commencement | 4 October 2012 |
| Term of the plan | 10 years |

Important: This factsheet summarises the rules contained in the *Water Sharing Plan for the Namoi and Peel Unregulated Rivers Water Sources 2012*. It is intended as a guide only. Approvals and licences also contain conditions that holders must comply with. You can access this information from your 'Statement of Approval' or 'Statement of Conditions' or alternatively via <https://waterregister.waternsw.com.au/water-register-frame>.

Access Rules

Manilla River management zone

Access rules for rivers and creeks

| | |
|---------------|--|
| Cease to pump | Users must cease to pump when the flows are equal to or less than 3 ML/day. Note: This rule applies to all extraction from rivers and creeks including natural in-river pools within the channels of rivers and creeks |
|---------------|--|

| | |
|-----------------|---|
| Reference point | Manilla River at Black Springs gauge (419053) |
|-----------------|---|

Access rules for natural off-river pools

| | |
|---------------|--|
| Cease to pump | Pumping is not permitted when the water level in that natural off-river pool is lower than its full capacity. Note: 'Full capacity' can be approximated by the pool water level at the point where there is no visible flow into and out of that pool. Note: Off-river pools include those natural pools located on flood runners or floodplains, or an effluent that only commences to flow during high |
|---------------|--|

| | |
|-----------------|-----------------------------------|
| Reference point | Individual natural off-river pool |
|-----------------|-----------------------------------|

Ironbark Creek management zone

Access rules for rivers and creeks

| | |
|-----------------|---|
| Cease to pump | Users must cease to pump when flows are equal to or below 3 ML/day. Note: This rule applies to all extraction from rivers and creeks including natural in-river pools within the channels of rivers and creeks. |
| Reference point | Ironbark Creek at Woodsreef gauge (419047) |

Access rules for natural off-river pools

| | |
|-----------------|---|
| Cease to pump | Pumping is not permitted when the water level in that natural off-river pool is lower than its full capacity. Note: 'Full capacity' can be approximated by the pool water level at the point where there is no visible flow into and out of that pool Note: Natural off-river pools include those located on flood runners, floodplains and effluents e.g. lakes, lagoons and billabongs. |
| Reference point | Individual natural off-river pool |

Manilla River Tributaries management zone

| | |
|-----------------|--|
| Cease to pump | Pumping is not permitted when the water level in that natural off-river pool is lower than its full capacity. Note: 'Full capacity' can be approximated by the pool water level at the point where there is no visible flow into and out of that pool Note: Natural off-river pools include those located on flood runners, floodplains and effluents e.g. lakes, lagoons and billabongs. Note: For pump sites not within a natural pool, the cease to pump rule is when there is no visible flow at that pump site. |
| Reference point | Individual natural pool |

Ironbark Creek tributaries management zone

| | |
|---------------|---|
| Cease to Pump | Pumping is not permitted when the water level in that natural off-river pool is lower than its full capacity. Note: 'Full capacity' can be approximated by the pool water level at the point where there is no visible flow into and out of that pool |
|---------------|---|

| | |
|-----------------|--|
| | <p>Note: Natural off-river pools include those located on flood runners, floodplains and effluents e.g. lakes, lagoons and billabongs.</p> <p>Note: For pump sites not within a natural pool, the cease to pump rule is when there is no visible flow at that pump site.</p> |
| Reference point | Individual natural pool |

Notes:

1. These access rules do not apply if the existing *Water Act 1912* entitlement had more stringent access licence conditions. These existing conditions will be carried forward under the plan and are included in clause 47(7) and the associated Appendix 3.
2. These access rules do not apply to:

| Water sharing plan | Namoi and Peel Unregulated Rivers Water Sources 2012 |
| Plan commencement | 4 October 2012 |
| Term of the plan | 10 years |

Important: This factsheet summarises the rules contained in the *Water Sharing Plan for the Namoi and Peel Unregulated Rivers Water Sources 2012*. It is intended as a guide only. Approvals and licences also contain conditions that holders must comply with. You can access this information from your 'Statement of Approval' or 'Statement of Conditions' or alternatively via <https://waterregister.waternsw.com.au/water-register-frame>.

Access Rules

| Access rules for rivers and creeks | |
|------------------------------------|---|
| Cease to pump | <p>Pumping is not permitted from natural pools when the water level in the pool is lower than its full capacity.</p> <p>Note: Full capacity can be approximated by the pool water level at the point where there is no visible flow into and out of that pool</p> <p>Note: Natural pools include in-river pools found within the channels of rivers and creeks and off-river pools located on flood runners, floodplains and effluents e.g. lakes, lagoons and billabongs.</p> <p>Note: For pump sites not within a natural pool, the cease to pump rule is when there is no visible flow at the pump site</p> |
| Reference point | Individual natural pool |

Notes:

1. These access rules do not apply if the existing *Water Act 1912* entitlement had more stringent access licence conditions. These existing conditions will be carried forward under the plan and are included in clause 47(7) and the associated Appendix 3.
2. These access rules do not apply to:
 - Local Water Utilities or unregulated (town water supply) access licences
 - Stock and Domestic (Domestic) licences
 - Water taken under a licence listed under clause 47(18) and the associated clause 1 of Schedule 3
 - The taking of water from existing dams. Any existing licence conditions associated with a dam will be carried forward under the plan.
 - For the first 5 years of the plan to water taken for stock watering by stock and domestic access licences

Trading rules

| Trade type | Rules |
|---------------------|--|
| Into water source | Allows trade of additional water entitlement into the Water Source from a water source with higher ecological value. The cap on entitlement is 261ML. Trades not permitted onto natural off-river pools. |
| Within water source | Trades are permitted, subject to assessment but not into natural off-river pools. |
