

Water sharing rules Berrara Creek Water Source

Water sharing plan	Clyde River Unregulated and Alluvial Water Sources
Plan commencement	1 April 2016
Term of the plan	10 years

Rules summary

The following rules are a guide only. To confirm the conditions pertaining to specific licences, please call the NSW DPI Water at Nowra on (02) 4428 9162.

Boundary definition

Includes all surface waters and underlying alluvium in the hydrological catchment of Berrara Creek.

Access rules

No current water licences have been identified in this water source, and no licences are permitted to be traded into this water source. Therefore, no access rules specific to this water source have been established.

Trading rules

INTO water source	Not permitted
WITHIN water source	N/A

More information about the planning process for the Clyde River Unregulated and Alluvial Water Sources is available at the NSW Department of Primary Industries, Water website: www.water.nsw.gov.au.

MOC14/1475

Water sharing rules Bimberamala Creek Water Source

Water sharing plan	Clyde River Unregulated and Alluvial Water Sources
Plan commencement	01 April 2016
Term of the plan	10 years

Rules summary

The following rules are a guide only. To confirm the conditions pertaining to specific licences, please call the NSW DPI Water at Nowra on (02) 4428 9162.

Boundary definition

Includes all surface waters and underlying alluvium in the hydrological catchment of Bimberamala Creek.

Access rules

No current water licences have been identified in this water source, and no licences are permitted to be traded into this water source. Therefore, no access rules specific to this water source have been established.

Trading rules

INTO water source	Not permitted
WITHIN water source	N/A

More information about the planning process for the Clyde River Unregulated and Alluvial Water Sources is available at the NSW Department of Primary Industries, Water website: www.water.nsw.gov.au.

MOC14/1475

Water sharing rules Boyne Creek Water Source

Water sharing plan	Clyde River Unregulated and Alluvial Water Sources
Plan commencement	01 April 2016
Term of the plan	10 years

Rules summary

The following rules are a guide only. To confirm the conditions pertaining to specific licences, please call the NSW DPI Water at Nowra on (02) 4428 9162.

Boundary definition

Includes all surface waters and underlying alluvium in the hydrological catchment of Boyne Creek.

Access rules

No current water licences have been identified in this water source, and no licences are permitted to be traded into this water source. Therefore, no access rules specific to this water source have been established.

Trading rules

INTO water source	Not permitted
WITHIN water source	N/A

More information about the planning process for the Clyde River Unregulated and Alluvial Water Sources is available at the NSW Department of Primary Industries, Water website: www.water.nsw.gov.au.

MOC14/1475

Water sharing rules Buckenbowra River Water Source

Water sharing plan	Clyde River Unregulated and Alluvial Water Sources
Plan commencement	01 April 2016
Term of the plan	10 years

Rules summary

The following rules are a guide only. To confirm the conditions pertaining to specific licences, please call the NSW DPI Water at Nowra on (02) 4428 9162.

Boundary definition

Includes all surface waters and underlying alluvium in the hydrological catchment of the Buckenbowra River.

Access rules for rivers, creeks and natural in-river pools

Cease-to-pump	Licence holders are not permitted to take water when flows are equal to or less than 3 ML/day at the reference point.
Total Daily Extraction Limit for Local Water Utility access licence	Extraction limit is equal to 50% of daily stream flows above 3 ML/day.
Reference point	Buckenbowra Rivers at Buckenbowra No. 3 gauge (216009)

Trading rules

INTO water source	Not permitted
WITHIN water source	Not applicable as the only entitlement in this water source is for Town Water Supply which cannot be traded to another licence category.

Rules for granting access licences

Unregulated river access licence	Not permitted
Aboriginal community development access licences	Not permitted

Rules for granting or amending approvals for surface water supply works

In-river dams (dams on streams of third order or higher)	Permitted, subject to assessment
---	----------------------------------

Rules for granting or amending approvals for groundwater supply works (bores)	
Rules to minimise interference between bores	<p>Approvals for groundwater supply works (bores) must not to be granted or amended within:</p> <ul style="list-style-type: none"> • 100 metres of a bore that is nominated by an aquifer access licence on another landholding • 100 metres of a bore that is used to extract basic landholder rights on another landholding • 500 metres of a bore nominated by a local water utility access licence • 100 metres of a bore that is used by the Department for monitoring purposes (unless agreed to in writing by the Department) or • 50 metres of a property boundary (unless negotiated in writing with neighbour).
Rules to protect groundwater dependent culturally significant sites	<ul style="list-style-type: none"> • Approvals for groundwater supply works to take water under basic landholder rights must not be granted or amended within 100 metres of a groundwater dependent culturally significant site. • Approvals for groundwater supply works nominated by aquifer access licences must not be granted or amended within 200 metres of a groundwater dependent culturally significant site.
Rules for bores located near contamination	<p>Approvals for groundwater supply works must not to be granted or amended:</p> <ul style="list-style-type: none"> • within 250 metres of the plume associated with a contamination source as identified within the plan, • between 250 metres and 500 metres of the plume associated with a contamination source as identified within the plan unless no drawdown of water will occur within 250 metres of the contamination, or • at a distance greater than 500 metres from the plume associated with a contamination source as identified within the plan if necessary to protect the water source, the environment or public health and safety. <p>Note: Due to the nature of managing contamination, bores may be subject to restrictions as a result of local impact management.</p>
Rules to protect sensitive environmental areas	<ul style="list-style-type: none"> • Approvals for groundwater supply works to take water under basic landholder rights must not be granted or amended within 100 metres of a groundwater dependent ecosystem (GDE). • Approvals for groundwater supply works nominated by aquifer access licences must not be granted or amended within 200 metres of a GDE. • Approvals for water supply works must not to be granted or amended at a distance greater than 200 metres of a high priority GDE if the bore is likely to cause more than minimal drawdown at the perimeter of that GDE. • Approvals for water supply works (bores) must not to be granted or amended within 40 metres from the top of the high bank of a river. <p>Note: High priority GDEs may be added to or removed from the plan based on further studies of GDE dependency.</p>

More information about the planning process for the Clyde River Unregulated and Alluvial Water Sources is available at the NSW Department of Primary Industries, Water website: www.water.nsw.gov.au.

Disclaimer: While every reasonable effort has been made to ensure that this document is correct at the time of printing, the State of New South Wales, its agents and employees, disclaim any and all liability to any person in respect of anything or the consequences of anything done or omitted to be done in reliance upon the whole or any part of this document.

MOC14/1475

Water sharing rules Burrill Lake Water Source

Water sharing plan	Clyde River Unregulated and Alluvial Water Sources
Plan commencement	01 April 2016
Term of the plan	10 years

Rules summary

The following rules are a guide only. To confirm the conditions pertaining to specific licences, please call the NSW DPI Water at Nowra on (02) 4428 9162.

Boundary definition

Includes all surface waters and underlying alluvium in the hydrological catchment of Burrill Lake.

Access rules for rivers, creeks and natural in-river pools

Cease-to-pump (see notes on page 2)	Licence holders are not permitted to take water when there is no visible flow at the pump site, or where water is being taken from a pool, when the volume of water in that pool is less than full capacity of the pool. Note: 'Full capacity' is the volume of water impounded in the pool when a visible flow out of that pool would cease.
Reference point	Pump site or the outflow of the pool from which water is taken.

Access rules for natural off-river pools

Cease-to-pump (see notes on page 2)	Licence holders are not permitted to take water from an off-river pool when the volume of water in that pool is less than the full capacity of the pool. Note: Natural off-river pools include those pools located on flood runners, floodplains and effluent streams e.g. lakes, lagoons and billabongs.
Reference point	Individual natural off-river pool

Access rules for alluvial aquifers

Cease-to-pump (see notes on page 2)	From year 6 of the plan, water is not to be taken from groundwater works nominated by access licences when there is no visible flow at the reference point. Note: Aquifer access licences arising from conversion of unregulated river access licences, and access licences other than aquifer access licences are subject to access rules from plan commencement. (See exemptions below.) Note: In most cases, groundwater extractions for domestic & stock purposes can be taken under Basic Landholder Rights and will not require an access licence. Note: Access rules only apply to groundwater works within 40 metres of a stream. At a later date, works further than 40 metres from any stream may be subject to these access rules with a lag time.
Reference point	River or creek closest to the water supply work

General notes	
<p>Note: <i>Water Act 1912</i> licence conditions that are more stringent than the plan rules are carried across to <i>Water Management Act 2000</i> licences.</p> <p>Note: Cease-to-pump rules do not apply to local water utility access licences or unregulated river (town water supply) access licences listed in clause 2 of Schedule 1 or clause 2 of Schedule 2 in the plan</p> <p>Note: All access rules described above do not apply:</p> <ol style="list-style-type: none"> 1. to water taken for “health and hygiene purposes” as listed in the plan (up to 20 kL/day), using works nominated by licences listed in clause 1 of Schedule 1 or clause 1 of Schedule 2 in the plan 2. to water taken for domestic consumption (up to 1 kL/house/day) using works nominated by domestic and stock access licences 3. for the first 3 years of the plan, to <u>surface</u> water taken for stock (up to 14 L/ha of grazeable area/day) using works nominated by domestic and stock access licences 4. for the first 5 years of the plan, to <u>groundwater</u> taken for stock using works nominated by domestic and stock access licences 5. to water taken from existing dams. Conditions on <i>Water Act 1912</i> licences which nominate in-river dams are carried across to <i>Water Management Act 2000</i> licences. 	
Trading rules	
INTO water source	<p>Permitted, subject to assessment, only if the total licensed entitlement in the water source does not exceed 137 ML/year.</p> <p>Note: The current level of surface water entitlement in this water source is estimated to be 190 ML/year. Trade into this water source will only be permitted if the total entitlement falls below 137 ML/year.</p>
WITHIN water source	Permitted, subject to assessment
Rules for granting access licences	
Unregulated river access licences	Not permitted
Aboriginal community development access licences	Not permitted
Rules for converting unregulated river access licences to a new category	
Conversion to high flows	Not permitted
Conversion to alluvial aquifer access licence	Permitted, subject to assessment
Rules for granting or amending approvals for surface water supply works	
In-river dams (dams on streams of third order or higher)	Permitted, subject to assessment

Rules for granting or amending approvals for groundwater supply works (bores)	
Rules to minimise interference between bores	<p>Approvals for groundwater supply works (bores) must not be granted or amended within:</p> <ul style="list-style-type: none"> • 100 metres of a bore that is nominated by an aquifer access licence on another landholding • 100 metres of a bore that is used to extract basic landholder rights on another landholding • 500 metres of a bore nominated by a local water utility access licence • 100 metres of a bore that is used by the Department for monitoring purposes (unless agreed to in writing by the Department) or • 50 metres of a property boundary (unless negotiated in writing with neighbour).
Rules to protect groundwater dependent culturally significant sites	<ul style="list-style-type: none"> • Approvals for groundwater supply works to take water under basic landholder rights must not be granted or amended within 100 metres of a groundwater dependent culturally significant site. • Approvals for groundwater supply works nominated by aquifer access licences must not be granted or amended within 200 metres of a groundwater dependent culturally significant site.

MOC14/1475

Water sharing rules Candlagan Creek water source

Water sharing plan	Clyde River Unregulated and Alluvial Water Sources
Plan commencement	01 April 2016
Term of the plan	10 years

Rules summary

The following rules are a guide only. To confirm the conditions pertaining to specific licences, please call the NSW DPI Water at Nowra on (02) 4428 9162.

Boundary definition

Includes all surface waters and underlying alluvium in the hydrological catchment of Candlagan Creek.

Access rules for rivers, creeks and natural in-river pools

Cease-to-pump (see notes on page 2)	Licence holders are not permitted to take water when there is no visible flow at the pump site, or where water is being taken from a pool, when the volume of water in that pool is less than full capacity of the pool. Note: 'Full capacity' is the volume of water impounded in the pool when a visible flow out of that pool would cease.
Reference point	Pump site or the outflow of the pool from which water is taken.

Access rules for natural off-river pools

Cease-to-pump (see notes on page 2)	Licence holders are not permitted to take water from an off-river pool when the volume of water in that pool is less than the full capacity of the pool. Note: Natural off-river pools include those pools located on flood runners, floodplains and effluent streams e.g. lakes, lagoons and billabongs.
Reference point	Individual natural off-river pool

Access rules for alluvial aquifers

Cease-to-pump (see notes on page 2)	From year 6 of the plan, water is not to be taken from groundwater works nominated by access licences when there is no visible flow at the reference point. Note: Aquifer access licences arising from conversion of unregulated river access licences, and access licences other than aquifer access licences are subject to access rules from plan commencement. (See exemptions below.) Note: In most cases, groundwater extractions for domestic & stock purposes can be taken under Basic Landholder Rights and will not require an access licence. Note: Access rules only apply to groundwater works within 40 metres of a stream. At a later date, works further than 40 metres from any stream may be subject to these access rules with a lag time.
Reference point	River or creek closest to the water supply work

MOC14/1475

Water sharing rules Clyde Estuary Tributaries Water Source

Water sharing plan	Clyde Unregulated and Alluvial Water Sources
Plan commencement	01 April 2016
Term of the plan	10 years

Rules summary

The following rules are a guide only. To confirm the conditions pertaining to specific licences, please call the NSW DPI Water at Nowra on (02) 4428 9162.

Boundary definition

Includes all surface waters and underlying alluvium in the hydrological catchment of the Clyde River downstream of Shallow Crossing.

Access rules for rivers, creeks and natural in-river pools

Cease-to-pump (see notes on page 2)	Licence holders are not permitted to take water when there is no visible flow at the pump site, or where water is being taken from a pool, when the volume of water in that pool is less than full capacity of the pool. Note: 'Full capacity' is the volume of water impounded in the pool when a visible flow out of that pool would cease.
Reference point	Pump site or the outflow of the pool from which water is taken.

Access rules for natural off-river pools

Cease-to-pump (see notes on page 2)	Licence holders are not permitted to take water from an off-river pool when the volume of water in that pool is less than the full capacity of the pool. Note: Natural off-river pools include those pools located on flood runners, floodplains and effluent streams e.g. lakes, lagoons and billabongs.
Reference point	Individual natural off-river pool

Access rules for alluvial aquifers

Cease-to-pump (see notes on page 2)	From year 6 of the plan, water is not to be taken from groundwater works nominated by access licences when there is no visible flow at the reference point. Note: Aquifer access licences arising from conversion of unregulated river access licences, and access licences other than aquifer access licences are subject to access rules from plan commencement. (See exemptions below.) Note: In most cases, groundwater extractions for domestic & stock purposes can be taken under Basic Landholder Rights and will not require an access licence. Note: Access rules only apply to groundwater works within 40 metres of a stream. At a later date, works further than 40 metres from any stream may be subject to these access rules with a lag time.
Reference point	River or creek closest to the water supply work

General notes	
<p>Note: <i>Water Act 1912</i> licence conditions that are more stringent than the plan rules are carried across to <i>Water Management Act 2000</i> licences.</p> <p>Note: Cease-to-pump rules do not apply to local water utility access licences or unregulated river (town water supply) access licences listed in clause 2 of Schedule 1 or clause 2 of Schedule 2 in the plan</p> <p>Note: All access rules described above do not apply:</p> <ol style="list-style-type: none"> 1. to water taken for “health and hygiene purposes” as listed in the plan (up to 20 kL/day), using works nominated by licences listed in clause 1 of Schedule 1 or clause 1 of Schedule 2 in the plan 2. to water taken for domestic consumption (up to 1 kL/house/day) using works nominated by domestic and stock access licences 3. for the first 3 years of the plan, to <u>surface</u> water taken for stock (up to 14 L/ha of grazeable area/day) using works nominated by domestic and stock access licences 4. for the first 5 years of the plan, to <u>groundwater</u> taken for stock using works nominated by domestic and stock access licences 5. to water taken from existing dams. Conditions on <i>Water Act 1912</i> licences which nominate in-river dams are carried across to <i>Water Management Act 2000</i> licences. 	
Trading rules	
INTO water source	Permitted, subject to assessment, only from the Cockwky Creek, Mid Clyde and Upper Clyde water sources, and only if the total licensed entitlement in the water source does not exceed 100 ML.
WITHIN water source	Permitted, subject to assessment
Rules for granting access licences	
Unregulated river access licences	Not permitted
Aboriginal community development access licences	Not permitted
Domestic and stock access licences	Permitted if the applicant can demonstrate a history of extraction in the area downstream from the defined tidal limit, provided that extraction was previously exempted from requiring a licence under the <i>Water Act 1912</i> .
Rules for converting unregulated river access licences to a new category	
Conversion to high flows	Not permitted
Conversion to alluvial aquifer access licence	Permitted, subject to assessment
Rules for granting or amending approvals for surface water supply works	
In-river dams (dams on streams of third order or higher)	Not permitted

Rules for granting or amending approvals for groundwater supply works (bores)	
Rules to minimise interference between bores	<p>Approvals for groundwater supply works (bores) must not to be granted or amended within:</p> <ul style="list-style-type: none"> • 100 metres of a bore that is nominated by an aquifer access licence on another landholding • 100 metres of a bore that is used to extract basic landholder rights on another landholding • 500 metres of a bore nominated by a local water utility access licence • 100 metres of a bore that is used by the Department for monitoring purposes (unless agreed to in writing by the Department) or • 50 metres of a property boundary (unless negotiated in writing with neighbour).

MOC14/1475

Water sharing rules Cockwhy Creek Water Source

Water sharing plan	Clyde River Unregulated and Alluvial Water Sources
Plan commencement	01 April 2016
Term of the plan	10 years

Rules summary

The following rules are a guide only. To confirm the conditions pertaining to specific licences, please call the NSW DPI Water at Nowra on (02) 4428 9162.

Boundary definition

Includes all surface waters and underlying alluvium in the hydrological catchment of the Cockwhy Creek.

Access rules for rivers, creeks and natural in-river pools

Cease-to-pump (see notes on page 2)	Licence holders are not permitted to take water when the flow at the reference point is equal to or less than 2 ML/day .
Reference point	Clyde River at Brooman gauge (216002)
Amendment provision	From Year 6 of the plan, if the total entitlement in the Mid Clyde, Upper Clyde and Cockwhy Creek water sources is equal to or greater than 133 ML , the plan may be amended such that licence holders are not permitted to take water when the flow at the reference point is equal to or less than 10 ML/day . This clause is included to provide incentive to reduce total entitlements in the Clyde Valley.

Access rules for natural off-river pools

Cease-to-pump (see notes on page 2)	Licence holders are not permitted to take water from an off-river pool when the volume of water in that pool is less than the full capacity of the pool. Note: 'Full capacity' is the volume of water impounded in the pool when a visible flow out of that pool would cease. Note: Natural off-river pools include those pools located on flood runners, floodplains and effluent streams e.g. lakes, lagoons and billabongs.
Reference point	Individual natural off-river pool

Access rules for alluvial aquifers	
Cease-to-pump (see notes on page 2)	<p>From year 6 of the plan, water is not to be taken from groundwater works nominated by access licences when the flow at the reference point is equal to or less than 2 ML/day.</p> <p>Note: Aquifer access licences arising from conversion of unregulated river access licences, and access licences other than aquifer access licences are subject to access rules from plan commencement. Reference point	Clyde River at Brooman gauge (216002)
General notes	
<p>Note: <i>Water Act 1912</i> licence conditions that are more stringent than the plan rules are carried across to <i>Water Management Act 2000</i> licences.</p> <p>Note: Cease-to-pump rules do not apply to local water utility access licences or unregulated river (town water supply) access licences listed in clause 2 of Schedule 1 or clause 2 of Schedule 2 in the plan</p> <p>Note: All access rules described above do not apply:</p> <ol style="list-style-type: none"> 1. to water taken for “health and hygiene purposes” as listed in the plan (up to 20 kL/day), using works nominated by licences listed in clause 1 of Schedule 1 or clause 1 of Schedule 2 in the plan 2. to water taken for domestic consumption (up to 1 kL/house/day) using works nominated by domestic and stock access licences 3. for the first 3 years of the plan, to <u>surface</u> water taken for stock (up to 14 L/ha of grazeable area/day) using works nominated by domestic and stock access licences 4. for the first 5 years of the plan, to <u>groundwater</u> taken for stock using works nominated by domestic and stock access licences 5. to water taken from existing dams. Conditions on <i>Water Act 1912</i> licences which nominate in-river dams are carried across to <i>Water Management Act 2000</i> licences. 	
Trading rules	
INTO water source	Not permitted
WITHIN water source	Permitted, subject to assessment
Rules for granting access licences	
Unregulated river access licences	Not permitted
Domestic and stock access licences	Permitted if the applicant can demonstrate a history of extraction in the area downstream from the defined tidal limit, provided that extraction was previously exempted from requiring a licence under the <i>Water Act 1912</i> .
Aboriginal community development access licences	Not permitted
Rules for converting unregulated river access licences to a new category	
Conversion to high flows	Not permitted
Conversion to alluvial aquifer access licence	Permitted, subject to assessment

Rules for granting or amending approvals for surface water supply works	
In-river dams (dams on streams of third order or higher)	Not permitted
Rules for granting or amending approvals for groundwater supply works (bores)	
Rules to minimise interference between bores	<p>Approvals for groundwater supply works (bores) must not to be granted or amended within:</p> <ul style="list-style-type: none"> • 100 metres of a bore that is nominated by an aquifer access licence on another landholding • 100 metres of a bore that is used to extract basic landholder rights on another landholding • 500 metres of a bore nominated by a local water utility access licence • 100 metres of a bore that is used by the Department for monitoring purposes (unless agreed to in writing by the Department) or • 50 metres of a property boundary (unless negotiated in writing with neighbour)
Rules to protect groundwater dependent culturally significant sites	<ul style="list-style-type: none"> • Approvals for groundwater supply works to take water under basic landholder rights must not be granted or amended within 100 metres of a groundwater dependent culturally significant site. • Approvals for groundwater supply works nominated by aquifer access licences must not be granted or amended within 200 metres of a groundwater dependent culturally significant site.
Rules for bores located near contamination	<p>Approvals for groundwater supply works must not to be granted or amended:</p> <ul style="list-style-type: none"> • within 250 metres of the plume associated with a contamination source as identified within the plan, • between 250 metres and 500 metres of the plume associated with a contamination source as identified within the plan unless no drawdown of water will occur within 250 metres of the contamination, or • at a distance greater than 500 metres from the plume associated with a contamination source as identified within the plan if necessary to protect the water source, the environment or public health and safety. <p>Note: Due to the nature of managing contamination, bores may be subject to restrictions as a result of local impact management.</p>
Rules to protect sensitive environmental areas	<ul style="list-style-type: none"> • Approvals for groundwater supply works to take water under basic landholder rights must not be granted or amended within 100 metres of a groundwater dependent ecosystem (GDE). • Approvals for groundwater supply works nominated by aquifer access licences must not be granted or amended within 200 metres of a GDE. • Approvals for water supply works must not to be granted or amended at a distance greater than 200 metres of a high priority GDE if the bore is likely to cause more than minimal drawdown at the perimeter of that GDE. • Approvals for water supply works (bores) must not to be granted or amended within 40 metres from the top of the high bank of a river. <p>Note: High priority GDEs may be added to or removed from the plan based on further studies of GDE dependency.</p>

More information about the planning process for the Clyde River Unregulated and Alluvial Water Sources is available at the NSW Department of Primary Industries, Water website: www.water.nsw.gov.au.

Water sharing rules Conjola Creek Water Source

Water sharing plan	Clyde River Unregulated and Alluvial Water Sources
Plan commencement	01 April 2016
Term of the plan	10 years

Rules summary

The following rules are a guide only. To confirm the conditions pertaining to specific licences, please call the NSW DPI Water at Nowra on (02) 4428 9162.

Boundary definition

Includes all surface waters and underlying alluvium in the hydrological catchment of the Conjola Creek.

Access rules for rivers, creeks and natural in-river pools

Cease-to-pump (see notes on page 2)	Licence holders are not permitted to take water when there is no visible flow at the pump site, or where water is being taken from a pool, when the volume of water in that pool is less than full capacity of the pool. Note: 'Full capacity' is the volume of water impounded in the pool when a visible flow out of that pool would cease.
Reference point	Pump site or the outflow of the pool from which water is taken.

Access rules for natural off-river pools

Cease-to-pump (see notes on page 2)	Licence holders are not permitted to take water from an off-river pool when the volume of water in that pool is less than the full capacity of the pool. Note: Natural off-river pools include those pools located on flood runners, floodplains and effluent streams e.g. lakes, lagoons and billabongs.
Reference point	Individual natural off-river pool

Access rules for alluvial aquifers

Cease-to-pump (see notes on page 2)	From year 6 of the plan, water is not to be taken from groundwater works nominated by access licences when there is no visible flow at the reference point. Note: Aquifer access licences arising from conversion of unregulated river access licences, and access licences other than aquifer access licences are subject to access rules from plan commencement. (See exemptions below.) Note: In most cases, groundwater extractions for domestic & stock purposes can be taken under Basic Landholder Rights and will not require an access licence. Note: Access rules only apply to groundwater works within 40 metres of a stream. At a later date, works further than 40 metres from any stream may be subject to these access rules with a lag time.
Reference point	River or creek closest to the water supply work

General notes	
<p>Note: <i>Water Act 1912</i> licence conditions that are more stringent than the plan rules are carried across to <i>Water Management Act 2000</i> licences.</p> <p>Note: Cease-to-pump rules do not apply to local water utility access licences or unregulated river (town water supply) access licences listed in clause 2 of Schedule 1 or clause 2 of Schedule 2 in the plan</p> <p>Note: All access rules described above do not apply:</p> <ol style="list-style-type: none"> 1. to water taken for “health and hygiene purposes” as listed in the plan (up to 20 kL/day), using works nominated by licences listed in clause 1 of Schedule 1 or clause 1 of Schedule 2 in the plan 2. to water taken for domestic consumption (up to 1 kL/house/day) using works nominated by domestic and stock access licences 3. for the first 3 years of the plan, to <u>surface</u> water taken for stock (up to 14 L/ha of grazeable area/day) using works nominated by domestic and stock access licences 4. for the first 5 years of the plan, to <u>groundwater</u> taken for stock using works nominated by domestic and stock access licences 5. to water taken from existing dams. MOC14/1475

Water sharing rules Currambene Creek Water Source

Water sharing plan	Clyde River Unregulated and Alluvial Water Sources
Plan commencement	01 April 2016
Term of the plan	10 years

Rules summary

The following rules are a guide only. To confirm the conditions pertaining to specific licences, please call the NSW DPI Water at Nowra on (02) 4428 9162.

Boundary definition

Includes all surface waters and underlying alluvium in the hydrological catchment of the Currambene Creek.

Access rules for rivers, creeks and natural in-river pools

Cease-to-pump (see notes on page 2)	Licence holders are not permitted to take water when flows are equal to or less than 0.5 ML/day at the reference point.
Reference point	Currambene Creek at Falls Creek gauge 216004

Access rules for natural off-river pools

Cease-to-pump (see notes on page 2)	Licence holders are not permitted to take water from an off-river pool when the volume of water in that pool is less than the full capacity of the pool. Note: 'Full capacity' is the volume of water impounded in the pool when a visible flow out of that pool would cease. Note: Natural off-river pools include those pools located on flood runners, floodplains and effluent streams e.g. lakes, lagoons and billabongs.
Reference point	Individual natural off-river pool

Access rules for alluvial aquifers

Cease-to-pump (see notes on page 2)	From year 6 of the plan, water is not permitted to be taken from groundwater works nominated by access licences when flows are equal to or less than 0.5 ML/day at the reference point. Note: Aquifer access licences arising from conversion of unregulated river access licences, and access licences other than aquifer access licences are subject to access rules from plan commencement. (See exemptions below.) Note: In most cases, groundwater extractions for domestic & stock purposes can be taken under Basic Landholder Rights and will not require an access licence. Note: Access rules only apply to groundwater works within 40 metres of a stream. At a later date, works further than 40 metres from any stream may be subject to these access rules with a lag time.
Reference point	Currambene Creek at Falls Creek gauge 216004

MOC14/1475

Water sharing rules Currowan Creek Water Source

Water sharing plan	Clyde River Unregulated and Alluvial Water Sources
Plan commencement	01 April 2016
Term of the plan	10 years

Rules summary

The following rules are a guide only. To confirm the conditions pertaining to specific licences, please call the NSW DPI Water at Nowra on (02) 4428 9162.

Boundary definition

Includes all surface waters and underlying alluvium in the hydrological catchment of Currowan Creek.

Access rules

No current water licences have been identified in this water source, and no licences are permitted to be traded into this water source. Therefore, no access rules specific to this water source have been established.

Trading rules

INTO water source	Not permitted
WITHIN water source	N/A

More information about the planning process for the Clyde River Unregulated and Alluvial Water Sources is available at the NSW Department of Primary Industries, Water website: www.water.nsw.gov.au.

MOC14/1475

Water sharing rules Meroo Lake Water Source

Water sharing plan	Clyde River Unregulated and Alluvial Water Sources
Plan commencement	01 April 2016
Term of the plan	10 years

Rules summary

The following rules are a guide only. To confirm the conditions pertaining to specific licences, please call the NSW DPI Water at Nowra on (02) 4428 9162.

Boundary definition

Includes all surface waters and underlying alluvium in the hydrological catchment of Meroo Lake.

Access rules for rivers, creeks and natural in-river pools

Cease-to-pump (see notes on page 2)	Licence holders are not permitted to take water when there is no visible flow at the pump site, or where water is being taken from a pool, when the volume of water in that pool is less than full capacity of the pool. Note: 'Full capacity' is the volume of water impounded in the pool when a visible flow out of that pool would cease.
Reference point	Pump site or the outflow of the pool from which water is taken.

Access rules for natural off-river pools

Cease-to-pump (see notes on page 2)	Licence holders are not permitted to take water from an off-river pool when the volume of water in that pool is less than the full capacity of the pool. Note: Natural off-river pools include those pools located on flood runners, floodplains and effluent streams e.g. lakes, lagoons and billabongs.
Reference point	Individual natural off-river pool

Access rules for alluvial aquifers

Cease-to-pump (see notes on page 2)	From year 6 of the plan, water is not to be taken from groundwater works nominated by access licences when there is no visible flow at the reference point. Note: Aquifer access licences arising from conversion of unregulated river access licences, and access licences other than aquifer access licences are subject to access rules from plan commencement. (See exemptions below.) Note: In most cases, groundwater extractions for domestic & stock purposes can be taken under Basic Landholder Rights and will not require an access licence. Note: Access rules only apply to groundwater works within 40 metres of a stream. At a later date, works further than 40 metres from any stream may be subject to these access rules with a lag time.
Reference point	River or creek closest to the water supply work

MOC14/1475

Water sharing rules Durras Lake Water Source

Water sharing plan	Clyde River Unregulated and Alluvial Water Sources
Plan commencement	01 April 2016
Term of the plan	10 years

Rules summary

The following rules are a guide only. To confirm the conditions pertaining to specific licences, please call the NSW DPI Water at Nowra on (02) 4428 9162.

Boundary definition

Includes all surface waters and underlying alluvium in the hydrological catchment of Durras Lake.

Access rules

No current water licences have been identified in this water source, and no licences are permitted to be traded into this water source. Therefore, no access rules specific to this water source have been established.

Trading rules

INTO water source	Not permitted
WITHIN water source	N/A

More information about the planning process for the Clyde River Unregulated and Alluvial Water Sources is available at the NSW Department of Primary Industries, Water website: www.water.nsw.gov.au.

Disclaimer: While every reasonable effort has been made to ensure that this document is correct at the time of printing, the State of New South Wales, its agents and employees, disclaim any and all liability to any person in respect of anything or the consequences of anything done or omitted to be done in reliance upon the whole or any part of this document.

MOC14/1475

Water sharing rules Holland Creek Water Source

Water sharing plan	Clyde River Unregulated and Alluvial Water Sources
Plan commencement	01 April 2016
Term of the plan	10 years

Rules summary

The following rules are a guide only. To confirm the conditions pertaining to specific licences, please call the NSW DPI Water at Nowra on (02) 4428 9162.

Boundary definition

Includes all surface waters and underlying alluvium in the hydrological catchment of Holland Creek.

Access rules

No current water licences have been identified in this water source, and no licences are permitted to be traded into this water source. Therefore, no access rules specific to this water source have been established.

Trading rules

INTO water source	Not permitted
WITHIN water source	N/A

More information about the planning process for the Clyde River Unregulated and Alluvial Water Sources is available at the NSW Department of Primary Industries, Water website: www.water.nsw.gov.au.

MOC14/1475

Water sharing rules Kioloa Water Source

Water sharing plan	Clyde River Unregulated and Alluvial Water Sources
Plan commencement	01 April 2016
Term of the plan	10 years

Rules summary

The following rules are a guide only. To confirm the conditions pertaining to specific licences, please call the NSW DPI Water at Nowra on (02) 4428 9162.

Boundary definition

Includes all surface waters and underlying alluvium in the hydrological coastal catchments between Durras Lake catchment and Willinga Lake catchment.

Access rules for rivers, creeks and natural in-river pools

Cease-to-pump (see notes on page 2)	Licence holders are not permitted to take water when there is no visible flow at the pump site, or where water is being taken from a pool, when the volume of water in that pool is less than full capacity of the pool. Note: 'Full capacity' is the volume of water impounded in the pool when a visible flow out of that pool would cease.
Reference point	Pump site or the outflow of the pool from which water is taken.

Access rules for natural off-river pools

Cease-to-pump (see notes on page 2)	Licence holders are not permitted to take water from an off-river pool when the volume of water in that pool is less than the full capacity of the pool. Note: Natural off-river pools include those pools located on flood runners, floodplains and effluent streams e.g. lakes, lagoons and billabongs.
Reference point	Individual natural off-river pool

Access rules for alluvial aquifers

Cease-to-pump (see notes on page 2)	From year 6 of the plan, water is not to be taken from groundwater works nominated by access licences when there is no visible flow at the reference point. Note: Aquifer access licences arising from conversion of unregulated river access licences, and access licences other than aquifer access licences are subject to access rules from plan commencement. (See exemptions below.) Note: In most cases, groundwater extractions for domestic & stock purposes can be taken under Basic Landholder Rights and will not require an access licence. Note: Access rules only apply to groundwater works within 40 metres of a stream. At a later date, works further than 40 metres from any stream may be subject to these access rules with a lag time.
Reference point	River or creek closest to the water supply work

General notes	
<p>Note: <i>Water Act 1912</i> licence conditions that are more stringent than the plan rules are carried across to <i>Water Management Act 2000</i> licences.</p> <p>Note: Cease-to-pump rules do not apply to local water utility access licences or unregulated river (town water supply) access licences listed in clause 2 of Schedule 1 or clause 2 of Schedule 2 in the plan</p> <p>Note: All access rules described above do not apply:</p> <ol style="list-style-type: none"> 1. to water taken for “health and hygiene purposes” as listed in the plan (up to 20 kL/day), using works nominated by licences listed in clause 1 of Schedule 1 or clause 1 of Schedule 2 in the plan 2. to water taken for domestic consumption (up to 1 kL/house/day) using works nominated by domestic and stock access licences 3. for the first 3 years of the plan, to <u>surface</u> water taken for stock (up to 14 L/ha of grazeable area/day) using works nominated by domestic and stock access licences 4. for the first 5 years of the plan, to <u>groundwater</u> taken for stock using works nominated by domestic and stock access licences 5. to water taken from existing dams. Conditions on <i>Water Act 1912</i> licences which nominate in-river dams are carried across to <i>Water Management Act 2000</i> licences. 	
Trading rules	
INTO water source	Permitted, subject to assessment, if the total licensed entitlement in the water source does not exceed 44 ML
WITHIN water source	Permitted, subject to assessment
Rules for granting access licences	
Unregulated river access licences	Not permitted
Aboriginal community development access licences	Not permitted
Rules for converting unregulated river access licences to a new category	
Conversion to high flows	Not permitted
Conversion to alluvial aquifer access licence	Permitted, subject to assessment
Rules for granting or amending approvals for surface water supply works	
In-river dams (dams on streams of third order or higher)	Permitted, subject to assessment

Rules for granting or amending approvals for groundwater supply works (bores)	
Rules to minimise interference between bores	<p>Approvals for groundwater supply works (bores) must not to be granted or amended within:</p> <ul style="list-style-type: none"> • 100 metres of a bore that is nominated by an aquifer access licence on another landholding • 100 metres of a bore that is used to extract basic landholder rights on another landholding • 500 metres of a bore nominated by a local water utility access licence • 100 metres of a bore that is used by the Department for monitoring purposes (unless agreed to in writing by the Department) or • 50 metres of a property boundary (unless negotiated in writing with neighbour).
Rules to protect groundwater dependent culturally significant sites	<ul style="list-style-type: none"> • Approvals for groundwater supply works to take water under basic landholder rights must not be granted or amended within 100 metres of a groundwater dependent culturally significant site. • Approvals for groundwater supply works nominated by aquifer access licences must not be granted or amended within 200 metres of a groundwater dependent culturally significant site.
Rules for bores located near contamination	<p>Approvals for groundwater supply works must not to be granted or amended:</p> <ul style="list-style-type: none"> • within 250 metres of the plume associated with a contamination source as identified within the plan, • between 250 metres and 500 metres of the plume associated with a contamination source as identified within the plan unless no drawdown of water will occur within 250 metres of the contamination, or • at a distance greater than 500 metres from the plume associated with a contamination source as identified within the plan if necessary to protect the water source, the environment or public health and safety. <p>Note: Due to the nature of managing contamination, bores may be subject to restrictions as a result of local impact management.</p>
Rules to protect sensitive environmental areas	<ul style="list-style-type: none"> • Approvals for groundwater supply works to take water under basic landholder rights must not be granted or amended within 100 metres of a groundwater dependent ecosystem (GDE). • Approvals for groundwater supply works nominated by aquifer access licences must not be granted or amended within 200 metres of a GDE. • Approvals for water supply works must not to be granted or amended at a distance greater than 200 metres of a high priority GDE if the bore is likely to cause more than minimal drawdown at the perimeter of that GDE. • Approvals for water supply works (bores) must not to be granted or amended within 40 metres from the top of the high bank of a river. <p>Note: High priority GDEs may be added to or removed from the plan based on further studies of GDE dependency.</p>

MOC14/1475

Water sharing rules Mid Clyde River Water Source

Water sharing plan	Clyde River Unregulated and Alluvial Water Sources
Plan commencement	01 April 2016
Term of the plan	10 years

Rules summary

The following rules are a guide only. To confirm the conditions pertaining to specific licences, please call the NSW DPI Water at Nowra on (02) 4428 9162.

Boundary definition

Includes all surface waters and underlying alluvium in the hydrological catchment of the Clyde River downstream of the confluence with Bimberamala River and upstream of Shallow Crossing.

Access rules for rivers, creeks and natural in-river pools

Cease-to-pump (see notes on page 2)	Licence holders are not permitted to take water when the flow at the reference point is equal to or less than 2 ML/day .
Reference point	Clyde River at Brooman gauge (216002)
Amendment provision	From Year 6 of the plan, if the total entitlement in the Mid Clyde, Upper Clyde and Cockwhy Creek water sources is equal to or greater than 133 ML , the plan may be amended such that licence holders are not permitted to take water when the flow at the reference point is equal to or less than 10 ML/day . This clause is included to provide incentive to reduce total entitlements in the Clyde Valley.

Access rules for natural off-river pools

Cease-to-pump (see notes on page 2)	Licence holders are not permitted to take water from an off-river pool when the volume of water in that pool is less than the full capacity of the pool. Note: 'Full capacity' is the volume of water impounded in the pool when a visible flow out of that pool would cease. Note: Natural off-river pools include those pools located on flood runners, floodplains and effluent streams e.g. lakes, lagoons and billabongs.
Reference point	Individual natural off-river pool

Access rules for alluvial aquifers	
Cease-to-pump (see notes on page 2)	<p>From year 6 of the plan, water is not permitted to be taken from groundwater works nominated by access licences when the flow at the reference point is equal to or less than 2 ML/day.</p> <p>Note: Aquifer access licences arising from conversion of unregulated river access licences, and access licences other than aquifer access licences are subject to access rules from plan commencement. Conditions on <i>Water Act 1912</i> licences which nominate in-river dams are carried across to <i>Water Management Act 2000</i> licences. 	
Trading rules	
INTO water source	Permitted, subject to assessment, up to a total of 90 ML/year for the water source. Note: The current level of surface water entitlement in this water source is estimated to be 218 ML/year. Trade into this water source will only be permitted if the total entitlement falls below 90 ML/year.
WITHIN water source	Permitted, subject to assessment
Rules for granting access licences	
Unregulated river access licences	Not permitted
Aboriginal community development access licences	Not permitted
Rules for converting unregulated river access licences to a new category	
Conversion to high flows	Not permitted
Conversion to alluvial aquifer access licence	Permitted, subject to assessment
Rules for granting or amending approvals for surface water supply works	
In-river dams (dams on streams of third order or higher)	Permitted, subject to assessment

Rules for granting or amending approvals for groundwater supply works (bores)	
Rules to minimise interference between bores	<p>Approvals for groundwater supply works (bores) must not to be granted or amended within:</p> <ul style="list-style-type: none"> • 100 metres of a bore that is nominated by an aquifer access licence on another landholding • 100 metres of a bore that is used to extract basic landholder rights on another landholding • 500 metres of a bore nominated by a local water utility access licence • 100 metres of a bore that is used by the Department for monitoring purposes (unless agreed to in writing by the Department) or • 50 metres of a property boundary (unless negotiated in writing with neighbour).
Rules to protect groundwater dependent culturally significant sites	<ul style="list-style-type: none"> • Approvals for groundwater supply works to take water under basic landholder rights must not be granted or amended within 100 metres of a groundwater dependent culturally significant site. • Approvals for groundwater supply works nominated by aquifer access licences must not be granted or amended within 200 metres of a groundwater dependent culturally significant site.
Rules for bores located near contamination	<p>Approvals for groundwater supply works must not to be granted or amended:</p> <ul style="list-style-type: none"> • within 250 metres of the plume associated with a contamination source as identified within the plan, • between 250 metres and 500 metres of the plume associated with a contamination source as identified within the plan unless no drawdown of water will occur within 250 metres of the contamination, or • at a distance greater than 500 metres from the plume associated with a contamination source as identified within the plan if necessary to protect the water source, the environment or public health and safety. <p>Note: Due to the nature of managing contamination, bores may be subject to restrictions as a result of local impact management.</p>
Rules to protect sensitive environmental areas	<ul style="list-style-type: none"> • Approvals for groundwater supply works to take water under basic landholder rights must not be granted or amended within 100 metres of a groundwater dependent ecosystem (GDE). • Approvals for groundwater supply works nominated by aquifer access licences must not be granted or amended within 200 metres of a GDE. • Approvals for water supply works must not to be granted or amended at a distance greater than 200 metres of a high priority GDE if the bore is likely to cause more than minimal drawdown at the perimeter of that GDE. • Approvals for water supply works (bores) must not to be granted or amended within 40 metres from the top of the high bank of a river. <p>Note: High priority GDEs may be added to or removed from the plan based on further studies of GDE dependency.</p>

More information about the planning process for the Clyde River Unregulated and Alluvial Water Sources is available at the NSW Department of Primary Industries, Water website: www.water.nsw.gov.au.

MOC14/1475

Water sharing rules Nelligen Creek Water Source

Water sharing plan	Clyde River Unregulated and Alluvial Water Sources
Plan commencement	01 April 2016
Term of the plan	10 years

Rules summary

The following rules are a guide only. To confirm the conditions pertaining to specific licences, please call the NSW DPI Water at Nowra on (02) 4428 9162.

Boundary definition

Includes all surface waters and underlying alluvium in the hydrological catchment of Nelligen Creek.

Access rules

No current water licences have been identified in this water source, and no licences are permitted to be traded into this water source. Therefore, no access rules specific to this water source have been established.

Trading rules

INTO water source	Not permitted
WITHIN water source	N/A

More information about the planning process for the Clyde River Unregulated and Alluvial Water Sources is available at the NSW Department of Primary Industries, Water website: www.water.nsw.gov.au.

Disclaimer: While every reasonable effort has been made to ensure that this document is correct at the time of printing, the State of New South Wales, its agents and employees, disclaim any and all liability to any person in respect of anything or the consequences of anything done or omitted to be done in reliance upon the whole or any part of this document.

MOC14/1475

Water sharing rules Nerrindillah Creek Water Source

Water sharing plan	Clyde River Unregulated and Alluvial Water Sources
Plan commencement	01 April 2016
Term of the plan	10 years

Rules summary

The following rules are a guide only. To confirm the conditions pertaining to specific licences, please call the NSW DPI Water at Nowra on (02) 4428 9162.

Boundary definition

Includes all surface waters and underlying alluvium in the hydrological catchment of Nerrindillah Creek.

Access rules for rivers, creeks and natural in-river pools

Cease-to-pump (see notes on page 2)	Licence holders are not permitted to take water when there is no visible flow at the pump site, or where water is being taken from a pool, when the volume of water in that pool is less than full capacity of the pool Note: 'Full capacity' is the volume of water impounded in the pool when a visible flow out of that pool would cease.
Reference point	Pump site or the outflow of the pool from which water is taken.

Access rules for natural off-river pools

Cease-to-pump (see notes on page 2)	Licence holders are not permitted to take water from an off-river pool when the volume of water in that pool is less than the full capacity of the pool. Note: Natural off-river pools include those pools located on flood runners, floodplains and effluent streams e.g. lakes, lagoons and billabongs.
Reference point	Individual natural off-river pool

Access rules for alluvial aquifers

Cease-to-pump (see notes on page 2)	From year 6 of the plan, water is not to be taken from groundwater works nominated by access licences when there is no visible flow at the reference point. Note: Aquifer access licences arising from conversion of unregulated river access licences, and access licences other than aquifer access licences are subject to access rules from plan commencement. (See exemptions below.) Note: In most cases, groundwater extractions for domestic & stock purposes can be taken under Basic Landholder Rights and will not require an access licence. Note: Access rules only apply to groundwater works within 40 metres of a stream. At a later date, works further than 40 metres from any stream may be subject to these access rules with a lag time.
Reference point	River or creek closest to the water supply work

General notes	
<p>Note: <i>Water Act 1912</i> licence conditions that are more stringent than the plan rules are carried across to <i>Water Management Act 2000</i> licences.</p> <p>Note: Cease-to-pump rules do not apply to local water utility access licences or unregulated river (town water supply) access licences listed in clause 2 of Schedule 1 or clause 2 of Schedule 2 in the plan</p> <p>Note: All access rules described above do not apply:</p> <ol style="list-style-type: none"> 1. to water taken for “health and hygiene purposes” as listed in the plan (up to 20 kL/day), using works nominated by licences listed in clause 1 of Schedule 1 or clause 1 of Schedule 2 in the plan 2. to water taken for domestic consumption (up to 1 kL/house/day) using works nominated by domestic and stock access licences 3. for the first 3 years of the plan, to <u>surface</u> water taken for stock (up to 14 L/ha of grazeable area/day) using works nominated by domestic and stock access licences 4. for the first 5 years of the plan, to <u>groundwater</u> taken for stock using works nominated by domestic and stock access licences 5. to water taken from existing dams. Conditions on <i>Water Act 1912</i> licences which nominate in-river dams are carried across to <i>Water Management Act 2000</i> licences. 	
Trading rules

MOC14/1475

Water sharing rules Swan Lake Basin Water Source

Water sharing plan	Clyde River Unregulated and Alluvial Water Sources
Plan commencement	01 April 2016
Term of the plan	10 years

Rules summary

The following rules are a guide only. To confirm the conditions pertaining to specific licences, please call the NSW DPI Water at Nowra on (02) 4428 9162.

Boundary definition

Includes all surface waters and underlying alluvium in the hydrological catchment of Swan Lake.

Access rules for rivers, creeks and natural in-river pools

Cease-to-pump (see notes on page 2)	Licence holders are not permitted to take water when there is no visible flow at the pump site, or where water is being taken from a pool, when the volume of water in that pool is less than full capacity of the pool. Note: 'Full capacity' is the volume of water impounded in the pool when a visible flow out of that pool would cease.
Reference point	Pump site or the outflow of the pool from which water is taken.

Access rules for natural off-river pools

Cease-to-pump (see notes on page 2)	Licence holders are not permitted to take water from an off-river pool when the volume of water in that pool is less than the full capacity of the pool. Note: Natural off-river pools include those pools located on flood runners, floodplains and effluent streams e.g. lakes, lagoons and billabongs.
Reference point	Individual natural off-river pool

Access rules for alluvial aquifers

Cease-to-pump (see notes on page 2)	From year 6 of the plan, water is not to be taken from groundwater works nominated by access licences when there is no visible flow at the reference point. Note: Aquifer access licences arising from conversion of unregulated river access licences, and access licences other than aquifer access licences are subject to access rules from plan commencement. (See exemptions below.) Note: In most cases, groundwater extractions for domestic & stock purposes can be taken under Basic Landholder Rights and will not require an access licence. Note: Access rules only apply to groundwater works within 40 metres of a stream. At a later date, works further than 40 metres from any stream may be subject to these access rules with a lag time.
Reference point	River or creek closest to the water supply work

General notes	
<p>Note: <i>Water Act 1912</i> licence conditions that are more stringent than the plan rules are carried across to <i>Water Management Act 2000</i> licences.</p> <p>Note: Cease-to-pump rules do not apply to local water utility access licences or unregulated river (town water supply) access licences listed in clause 2 of Schedule 1 or clause 2 of Schedule 2 in the plan</p> <p>Note: All access rules described above do not apply:</p> <ol style="list-style-type: none"> 1. to water taken for “health and hygiene purposes” as listed in the plan (up to 20 kL/day), using works nominated by licences listed in clause 1 of Schedule 1 or clause 1 of Schedule 2 in the plan 2. to water taken for domestic consumption (up to 1 kL/house/day) using works nominated by domestic and stock access licences 3. for the first 3 years of the plan, to <u>surface</u> water taken for stock (up to 14 L/ha of grazeable area/day) using works nominated by domestic and stock access licences 4. for the first 5 years of the plan, to <u>groundwater</u> taken for stock using works nominated by domestic and stock access licences 5. to water taken from existing dams. Conditions on <i>Water Act 1912</i> licences which nominate in-river dams are carried across to <i>Water Management Act 2000</i> licences. 	
Trading rules

MOC14/1475

Water sharing rules Tabourie Lake Water Source

Water sharing plan	Clyde River Unregulated and Alluvial Water Sources
Plan commencement	01 April 2016
Term of the plan	10 years

Rules summary

The following rules are a guide only. To confirm the conditions pertaining to specific licences, please call the NSW DPI Water at Nowra on (02) 4428 9162.

Boundary definition

Includes all surface waters and underlying alluvium in the hydrological catchment of Tabourie Lake.

Access rules for rivers, creeks and natural in-river pools

Cease-to-pump (see notes on page 2)	Licence holders are not permitted to take water when there is no visible flow at the pump site, or where water is being taken from a pool, when the volume of water in that pool is less than full capacity of the pool. Note: 'Full capacity' is the volume of water impounded in the pool when a visible flow out of that pool would cease.
Reference point	Pump site or the outflow of the pool from which water is taken.

Access rules for natural off-river pools

Cease-to-pump (see notes on page 2)	Licence holders are not permitted to take water from an off-river pool when the volume of water in that pool is less than the full capacity of the pool. Note: Natural off-river pools include those pools located on flood runners, floodplains and effluent streams e.g. lakes, lagoons and billabongs.
Reference point	Individual natural off-river pool

Access rules for alluvial aquifers

Cease-to-pump (see notes on page 2)	From year 6 of the plan, water is not to be taken from groundwater works nominated by access licences when there is no visible flow at the reference point. MOC14/1475

Water sharing rules Upper Clyde River Water Source

Water sharing plan	Clyde River Unregulated and Alluvial Water Sources
Plan commencement	01 April 2016
Term of the plan	10 years

Rules summary

The following rules are a guide only. To confirm the conditions pertaining to specific licences, please call the NSW DPI Water at Nowra on (02) 4428 9162.

Boundary definition

Includes all surface waters and underlying alluvium in the hydrological catchment of the Clyde River upstream of the confluence with Bimberamala River.

Access rules for rivers, creeks and natural in-river pools

Cease-to-pump (see notes on page 2)	Licence holders are not permitted to take water when the flow at the reference point is equal to or less than 2 ML/day .
Reference point	Clyde River at Brooman gauge (216002)
Amendment provision	From Year 6 of the plan, if the total entitlement in the Mid Clyde, Upper Clyde and Cockwhy Creek water sources is equal to or greater than 133 ML , the plan may be amended such that licence holders are not permitted to take water when the flow at the reference point is equal to or less than 10 ML/day . This clause is included to provide incentive to reduce total entitlements in the Clyde Valley.

Access rules for natural off-river pools

Cease-to-pump (see notes on page 2)	Licence holders are not permitted to take water from an off-river pool when the volume of water in that pool is less than the full capacity of the pool. Note: 'Full capacity' is the volume of water impounded in the pool when a visible flow out of that pool would cease. Note: Natural off-river pools include those pools located on flood runners, floodplains and effluent streams e.g. lakes, lagoons and billabongs.
Reference point	Individual natural off-river pool

Access rules for alluvial aquifers	
Cease-to-pump (see notes on page 2)	<p>From year 6 of the plan, water is not permitted to be taken from groundwater works nominated by access licences when the flow at the reference point is less than or equal to 2 ML/day.</p> <p>Note: Aquifer access licences arising from conversion of unregulated river access licences, and access licences other than aquifer access licences are subject to access rules from plan commencement. (See exemptions below.)</p> <p>Note: In most cases, groundwater extractions for domestic & stock purposes can be taken under Basic Landholder Rights and will not require an access licence.</p> <p>Note: Access rules only apply to groundwater works within 40 metres of a stream. At a later date, works further than 40 metres from any stream may be subject to these access rules with a lag time.</p>

MOC14/1475

Water sharing rules Wandandian Creek Water Source

Water sharing plan	Clyde River Unregulated and Alluvial Water Sources
Plan commencement	01 April 2016
Term of the plan	10 years

Rules summary

The following rules are a guide only. To confirm the conditions pertaining to specific licences, please call the NSW DPI Water at Nowra on (02) 4428 9162.

Boundary definition

Includes all surface waters and underlying alluvium in the hydrological catchment of the Wandandian Creek.

Access rules for rivers, creeks and natural in-river pools

Cease-to-pump (see notes on page 2)	Licence holders are not permitted to take water when there is no visible flow at the pump site, or where water is being taken from a pool, when the volume of water in that pool is less than full capacity of the pool. Note: 'Full capacity' is the volume of water impounded in the pool when a visible flow out of that pool would cease.
Reference point	Pump site or the outflow of the pool from which water is taken.

Access rules for natural off-river pools

Cease-to-pump (see notes on page 2)	Licence holders are not permitted to take water from an off-river pool when the volume of water in that pool is less than the full capacity of the pool. Note: Natural off-river pools include those pools located on flood runners, floodplains and effluent streams e.g. lakes, lagoons and billabongs.
Reference point	Individual natural off-river pool

Access rules for alluvial aquifers

Cease-to-pump (see notes on page 2)	From year 6 of the plan, water is not to be taken from groundwater works nominated by access licences when there is no visible flow at the reference point. Note: Aquifer access licences arising from conversion of unregulated river access licences, and access licences other than aquifer access licences are subject to access rules from plan commencement. (See exemptions below.) Note: In most cases, groundwater extractions for domestic & stock purposes can be taken under Basic Landholder Rights and will not require an access licence. Note: Access rules only apply to groundwater works within 40 metres of a stream. At a later date, works further than 40 metres from any stream may be subject to these access rules with a lag time.
Reference point	River or creek closest to the water supply work

General notes	
<p>Note: <i>Water Act 1912</i> licence conditions that are more stringent than the plan rules are carried across to <i>Water Management Act 2000</i> licences.</p> <p>Note: Cease-to-pump rules do not apply to local water utility access licences or unregulated river (town water supply) access licences listed in clause 2 of Schedule 1 or clause 2 of Schedule 2 in the plan</p> <p>Note: All access rules described above do not apply:</p> <ol style="list-style-type: none"> 1. to water taken for “health and hygiene purposes” as listed in the plan (up to 20 kL/day), using works nominated by licences listed in clause 1 of Schedule 1 or clause 1 of Schedule 2 in the plan 2. to water taken for domestic consumption (up to 1 kL/house/day) using works nominated by domestic and stock access licences 3. for the first 3 years of the plan, to <u>surface</u> water taken for stock (up to 14 L/ha of grazeable area/day) using works nominated by domestic and stock access licences 4. for the first 5 years of the plan, to <u>groundwater</u> taken for stock using works nominated by domestic and stock access licences 5. to water taken from existing dams. Conditions on <i>Water Act 1912</i> licences which nominate in-river dams are carried across to <i>Water Management Act 2000</i> licences.

MOC14/1475

Water sharing rules Wollumboola Lake Water Source

Water sharing plan	Clyde River Unregulated and Alluvial Water Sources
Plan commencement	01 April 2016
Term of the plan	10 years

Rules summary

The following rules are a guide only. To confirm the conditions pertaining to specific licences, please call the NSW DPI Water at Nowra on (02) 4428 9162.

Boundary definition

Includes all surface waters and underlying alluvium in the hydrological catchment of the Wollumboola Lake.

Access rules

No current water licences have been identified in this water source, and no licences are permitted to be traded into this water source. Therefore, no access rules specific to this water source have been established.

Trading rules

INTO water source	Not permitted
WITHIN water source	N/A

More information about the planning process for the Clyde River Unregulated and Alluvial Water Sources is available at the NSW Department of Primary Industries, Water website: www.water.nsw.gov.au.
