

## Rules summary sheet: Backwater Boggy Creek Water Source

*Water Sharing Plan for the Macquarie Bogan Unregulated Rivers Water Sources 2012*

### Plan details

<b>Water sharing plan</b>	Macquarie Bogan Unregulated Rivers Water Sources 2012
<b>Plan commencement</b>	4 October 2012
<b>Term of the plan</b>	10 years

**Important:** This factsheet summarises the rules contained in the *Water Sharing Plan for the Macquarie Bogan Unregulated Rivers Water Sources 2012*. It is intended as a guide only. Approvals and licences also contain conditions that holders must comply with. You can access this information from your 'Statement of Approval' or 'Statement of Conditions' or alternatively via <https://waterregister.watarnsw.com.au/water-register-frame>.

### Access Rules

Access Rules	
Cease to pump	<p>Pumping is not permitted from natural pools when the water level in the pool is lower than its full capacity.</p> <p><b>Note:</b> 'Full capacity' can be approximated by the pool water level at the point where there is no visible flow into and out of that pool.</p> <p><b>Note:</b> Natural pools include in-river pools found within the channels of rivers and creeks and off-river pools located on flood runners, floodplains and effluents e.g. lakes, lagoons and billabongs.</p> <p><b>Note:</b> For pump sites not within a natural pool, the cease to pump rule is when there is no visible flow at that pump site.</p>
Reference point	Individual natural pool

**Notes:** These access rules do not apply:

1. if the existing *Water Act 1912* entitlement had more stringent access licence conditions. These existing conditions will be carried forward under the plan and are included in appendix 2.
2. to major water utility, local water utility or unregulated river (town water supply) access licences
3. to water taken for domestic consumption by stock and domestic access licences
4. to water taken from existing dams. Any existing licence conditions associated with a dam will be carried forward under the plan.

## Trading Rules

Trade Rules	
<b>Into</b> water source	Not permitted
<b>Within</b> water source	Trades are permitted, subject to assessment

More information about the planning process for the *Water Sharing Plan for the Macquarie Bogan Unregulated Rivers Water Sources 2012* is available at the Department of Planning, Industry and Environment's website: [www.industry.nsw.gov.au/water](http://www.industry.nsw.gov.au/water)

<b>Water sharing plan</b>	Macquarie Bogan Unregulated Rivers Water Sources 2012
<b>Plan commencement</b>	4 October 2012
<b>Term of the plan</b>	10 years

**Important:** This factsheet summarises the rules contained in the *Water Sharing Plan for the Macquarie Bogan Unregulated Rivers Water Sources 2012*. It is intended as a guide only. Approvals and licences also contain conditions that holders must comply with. You can access this information from your 'Statement of Approval' or 'Statement of Conditions' or alternatively via <https://waterregister.watarnsw.com.au/water-register-frame>.

### Access Rules

<b>Bulbodney Grahway management zone</b>	
Cease to pump	<p>Pumping is not permitted from natural pools when the water level in the pool is lower than its full capacity.</p> <p><b>Note:</b> 'Full capacity' can be approximated by the pool water level at the point where there is no visible flow into and out of that pool.</p> <p><b>Note:</b> Natural pools include in-river pools found within the channels of rivers and creeks and off-river pools located on flood runners, floodplains and effluents e.g. lakes, lagoons and billabongs.</p> <p><b>Note:</b> For pump sites not within a natural pool, the cease to pump rule is when there is no visible flow at that pump site.</p>
Reference point	Individual natural pool
<b>Lower Nyngan Weir Pool management zone</b>	
Cease to pump	<p>Pumping is not permitted when the water level in the Lower Nyngan weir pool is lower than 50 per cent of its full capacity.</p> <p><b>Note:</b> 'Full capacity' can be approximated by the pool water level at the point where there is no visible flow into and out of that pool.</p> <p><b>Note:</b> For the purposes of implementing this rule, the Minister may determine a water level at the telemetric gauge on the Bogan River at Nyngan (421138) that is to be considered equivalent to 50 per cent of the full capacity of Lower Nyngan weir pool</p>
Reference point	Lower Nyngan weir pool

# Macquarie Bogan Unregulated Rivers Water Sources

Rules summary sheet 3 of 30

Commence to pump	<p>Pumping is not permitted when the water level in the Lower Nyngan weir pool is lower than 50 per cent of its full capacity.</p> <p><b>Note:</b> 'Full capacity' can be approximated by the pool water level at the point where there is no visible flow into and out of that pool.</p> <p><b>Note:</b> For the purposes of implementing this rule, the Minister may determine a water level at the telemetric gauge on the Bogan River at Nyngan (421138) that is to be considered equivalent to 50 per cent of the full capacity of Lower Nyngan weir pool</p>
Reference point	Lower Nyngan weir sill and Neurie Plains gauge (421039)
Amendment provision	If it is determined that that town water supplies or replenishment flows released from the Macquarie Regulated River are not being adequately protected by the proposed provisions in the plan, these rules may be amended to ensure these flows are preserved.

## Upper Nyngan Weir Pool management zone

Cease to pump	Pumping is not permitted when the water level in the Upper Nyngan weir pool is 70 centimetres or more below the concrete sill of the weir.
Reference point	Upper Nyngan weir sill
Commence to pump	<p>After a cease to pump has been in place, pumping is not permitted to recommence until there has been a flow in the Bogan River measured at the Neurie Plains gauge and a flow of water over the concrete sill of the Lower Nyngan weir.</p> <p><b>Note:</b> The commence to pump rule may not apply where:</p> <ul style="list-style-type: none"> <li>• The licence holder also holds an access licence with a share component that nominates the Macquarie and Cudgegong Regulated Rivers Water Source, and has ordered water under that access licence to be delivered to the Albert Priest Channel,</li> <li>• the licence holder is a member of the Albert Priest Channel Association,</li> <li>• the volume of water taken is equal to or less than 80% of the volume of water ordered</li> <li>• the water is taken within 30 days of the delivery of the water to the Upper Nyngan Weir Pool.</li> </ul>
Reference point	Lower Nyngan weir sill and Neurie Plains gauge (421039)
Amendment provision	If it is determined that that town water supplies or replenishment flows released from the Macquarie Regulated River are not being adequately protected by the proposed provisions in the plan, these rules may be amended to ensure these flows are preserved.

**Notes:** These access rules do not apply:

1. if the existing *Water Act 1912* entitlement had more stringent access licence conditions. These existing conditions will be carried forward under the plan and are included in appendix 2.
2. to major water utility, local water utility or unregulated river (town water supply) access licences
3. to water taken for domestic consumption by stock and domestic access licences
4. to water taken from existing dams. Any existing licence conditions associated with a dam will be carried forward under the plan.

## Trading Rules

<b>Bulbodney Grahway management zone</b>	
<b>Into</b> management zone	Trades are permitted in from the Lower Bogan River and Upper Bogan River water sources and the Upper Nyngan Weir Pool and Lower Nyngan Weir Pool management zones. Trades in unregulated river (special additional high flow) licences are not permitted into this management zone.
<b>Within</b> management zone	Trades are permitted, subject to assessment
<b>Lower Nyngan Weir Pool management zone</b>	
<b>Into</b> management zone	Trades are permitted in from the Upper Nyngan Weir Pool management zone. Trades in unregulated river (special additional high flow) licences are not permitted into this management zone.
<b>Within</b> management zone	Trades are permitted, subject to assessment
<b>Upper Nyngan Weir Pool management zone</b>	
<b>Into</b> management zone	Trades are permitted in from the Lower Nyngan Weir Pool management zone. Trades in unregulated river (special additional high flow) licences are not permitted into this management zone.
<b>Within</b> management zone	Trades are permitted, subject to assessment

## Rules summary sheet: Lawson Creek Water Source

### *Water Sharing Plan for the Macquarie Bogan Unregulated Rivers Water Sources 2012*

#### Plan details

<b>Water sharing plan</b>	Macquarie Bogan Unregulated Rivers Water Sources 2012
<b>Plan commencement</b>	4 October 2012
<b>Term of the plan</b>	10 years

**Important:** This factsheet summarises the rules contained in the *Water Sharing Plan for the Macquarie Bogan Unregulated Rivers Water Sources 2012*. It is intended as a guide only. Approvals and licences also contain conditions that holders must comply with. You can access this information from your 'Statement of Approval' or 'Statement of Conditions' or alternatively via <https://waterregister.waternsw.com.au/water-register-frame>.

## Access Rules

Access Rules	
Cease to pump	<p>Pumping is not permitted from natural pools when the water level in the pool is lower than its full capacity.</p> <p><b>Note:</b> 'Full capacity' can be approximated by the pool water level at the point where there is no visible flow into and out of that pool.</p> <p><b>Note:</b> Natural pools include in-river pools found within the channels of rivers and creeks and off-river pools located on flood runners, floodplains and effluents e.g. lakes, lagoons and billabongs.</p> <p><b>Note:</b> For pump sites not within a natural pool, the cease to pump rule is when there is no visible flow at that pump site.</p>
Reference point	Individual natural pool

**Notes:** These access rules do not apply:

1. if the existing *Water Act 1912* entitlement had more stringent access licence conditions. These existing conditions will be carried forward under the plan and are included in appendix 2.
2. to major water utility, local water utility or unregulated river (town water supply) access licences
3. to water taken for domestic consumption by stock and domestic access licences
4. to water taken from existing dams. Any existing licence conditions associated with a dam will be carried forward under the plan.

## Trading Rules

Trade Rules	
<b>Into</b> water source	Not permitted
<b>Within</b> water source	Trades are permitted, subject to assessment

#### Access Rules

<b>Gum Cowal management zone</b>	
Cease to pump	<p>Pumping is not permitted from natural pools when the water level in the pool is lower than its full capacity.</p> <p><b>Note:</b> 'Full capacity' can be approximated by the pool water level at the point where there is no visible flow into and out of that pool.</p> <p><b>Note:</b> Natural pools include in-river pools found within the channels of rivers and creeks and off-river pools located on flood runners, floodplains and effluents e.g. lakes, lagoons and billabongs.</p> <p><b>Note:</b> For pump sites not within a natural pool, the cease to pump rule is when there is no visible flow at that pump site.</p>
Reference point	Individual natural pool
<b>Lower Macquarie River upstream management zone</b>	
Cease to pump	<p>Users must cease to pump when the flow at the reference point is equal to or less than 500 ML/day</p> <p><b>Note:</b> This rule applies to all extraction from rivers and creeks including natural in-river pools within the channels of rivers and creeks.</p>
Reference point	Macquarie River at Oxley gauge (421022)
<b>Lower Macquarie River downstream management zone</b>	
Cease to pump	<p>Pumping is not permitted from natural pools when the water level in the pool is lower than its full capacity.</p> <p><b>Note:</b> 'Full capacity' can be approximated by the pool water level at the</p>

	<p>point where there is no visible flow into and out of that pool.</p> <p><b>Note:</b> Natural pools include in-river pools found within the channels of rivers and creeks and off-river pools located on flood runners, floodplains and effluents e.g. lakes, lagoons and billabongs.</p> <p><b>Note:</b> For pump sites not within a natural pool, the cease to pump rule is when there is no visible flow at that pump site.</p>
Reference point	Individual natural pool
Cease to pump for new trades into management zone	<p>Pumping is not permitted when the flow at the reference point is equal to or less than 50 ML/day</p> <p><b>Note:</b> This rule applies to all extraction from rivers and creeks including natural in-river pools within the channels of rivers and creeks.</p>
Reference point	Macquarie River at Bells Bridge gauge (421012)

### Access rules for natural off-river pools

Cease to pump	<p>Pumping is not permitted when the water level in that natural off-river pool is lower than its full capacity</p> <p><b>Note:</b> 'Full capacity' can be approximated by the pool water level at the point where there is no visible flow into and out of that pool.</p> <p><b>Note:</b> Natural off-river pools include those pools located on flood runners, floodplains and effluents e.g. lakes, lagoons and billabongs.</p>
Reference point	Individual natural off-river pool

### Active Management

Access rules	<p>Access rules are in place to protect held environment water and releases made from the Macquarie Environmental Water Allowance (active sub allowance 2) in this water source.</p> <p>Take of water may be prohibited or a volumetric limit set, to protect the active environmental water moving through each management zone, in accordance with the Active Management Procedures Manual.</p> <p>Announcements describing the temporary access conditions will be made by the Minister and published on the Water NSW website.</p> <p><b>Note:</b> Active management rules will be in force from 1 December 2020</p>
--------------	--

**Notes:** These cease to pump rules do not apply:

1. if the existing *Water Act 1912* entitlement had more stringent access licence conditions. These existing conditions will be carried forward under the plan and are included in appendix 2.
2. to major water utility, local water utility or unregulated river (town water supply) access licences
3. to water taken for domestic consumption by stock and domestic access licences
4. to water taken from existing dams. Any existing licence conditions associated with a dam will be carried forward under the plan.

## Trading Rules

Gum Cowl management zone	
Into management zone	Not permitted
Within management zone	Trades are permitted in a downstream direction only. <b>Note:</b> Works may be installed upstream of existing works if they remain within the same Lot and DP.
Lower Macquarie River upstream management zone	
Into management zone	Not permitted.
Within management zone	Trades are permitted in a downstream direction only. <b>Note:</b> Works may be installed upstream of existing works if they remain within the same Lot and DP.
Lower Macquarie River downstream management zone	
Into management zone	Trades are permitted in from the Marthaguy Creek water source, the Gum Cowl management zone and the Lower Macquarie River Upstream management zone, subject to the higher access rule of 50ML/day at the Bells Bridge gauge. Trades in unregulated river (special additional high flow) licences are not permitted into this management zone.
Within management zone	Trades are permitted, subject to assessment

### Access Rules

<b>Macquarie River above Bathurst management zone</b>	
Cease to pump	<p>Pumping is not permitted when Ben Chifley dam is equal to or less than 22% capacity, which equates to the water level being approximately 700 m at the storage gauge.</p> <p><b>Note:</b> 22% of the capacity of Ben Chifley Dam corresponds to Level 5 water restrictions (Bathurst Regional Council). Up to date information on the capacity of the dam is available on the website of Bathurst Regional Council (<a href="http://www.bathurst.nsw.gov.au/environment/water">www.bathurst.nsw.gov.au/environment/water</a>).</p>
Reference point	Ben Chifley dam storage gauge (563008)
<b>Macquarie River between Bathurst and Evans Plans Creek management zone</b>	
Cease to pump	<p>Pumping is not permitted from natural pools when the water level in the pool is lower than its full capacity.</p> <p><b>Note:</b> 'Full capacity' can be approximated by the pool water level at the point where there is no visible flow into and out of that pool.</p> <p><b>Note:</b> Natural pools include in-river pools found within the channels of rivers and creeks and off-river pools located on flood runners, floodplains and effluents e.g. lakes, lagoons and billabongs.</p> <p><b>Note:</b> For pump sites not within a natural pool, the cease to pump rule is when there is no visible flow at that pump site.</p>

Reference point	Individual natural pool
<b>Macquarie River tributaries management zone</b>	
Cease to pump	<p>Pumping is not permitted from natural pools when the water level in the pool is lower than its full capacity.</p> <p><b>Note:</b> 'Full capacity' can be approximated by the pool water level at the point where there is no visible flow into and out of that pool.</p> <p><b>Note:</b> Natural pools include in-river pools found within the channels of rivers and creeks and off-river pools located on flood runners, floodplains and effluents e.g. lakes, lagoons and billabongs.</p> <p><b>Note:</b> For pump sites not within a natural pool, the cease to pump rule is when there is no visible flow at that pump site.</p>
Reference point	Individual natural pool
Amendment provision	The cease to pump threshold and reference point may be amended by the Minister after year five of the plan, if there are adequate flow records established, and the threshold is set at a level that is more than visible flow and equal to or less than the 95th percentile of flows in January.
<b>Access rules for natural off-river pools</b>	
Cease to pump	<p>Pumping is not permitted when the water level in that natural off-river pool is lower than its full capacity</p> <p><b>Note:</b> 'Full capacity' can be approximated by the pool water level at the point where there is no visible flow into and out of that pool.</p> <p><b>Note:</b> Natural off-river pools include those pools located on flood runners, floodplains and effluents e.g. lakes, lagoons and billabongs.</p>
Reference point	Individual natural off-river pool

**Notes:** These access rules do not apply:

1. if the existing *Water Act 1912* entitlement had more stringent access licence conditions. These existing conditions will be carried forward under the plan and are included in appendix 2.
2. to major water utility, local water utility or unregulated river (town water supply) access licences
3. to water taken for domestic consumption by stock and domestic access licences
4. to water taken from existing dams. Any existing licence conditions associated with a dam will be carried forward under the plan.

#### Access Rules

Access Rules	
Cease to pump	<p>Pumping is not permitted from natural pools when the water level in the pool is lower than its full capacity.</p> <p><b>Note:</b> 'Full capacity' can be approximated by the pool water level at the point where there is no visible flow into and out of that pool.</p> <p><b>Note:</b> Natural pools include in-river pools found within the channels of rivers and creeks and off-river pools located on flood runners, floodplains and effluents e.g. lakes, lagoons and billabongs.</p> <p><b>Note:</b> For pump sites not within a natural pool, the cease to pump rule is when there is no visible flow at that pump site.</p>
Reference point	Individual natural pool

**Notes:** These access rules do not apply:

1. if the existing *Water Act 1912* entitlement had more stringent access licence conditions. These existing conditions will be carried forward under the plan and are included in appendix 2.
2. to major water utility, local water utility or unregulated river (town water supply) access licences
3. to water taken for domestic consumption by stock and domestic access licences
4. to water taken from existing dams. Any existing licence conditions associated with a dam will be carried forward under the plan.

## Trading Rules

### Access Rules

Access Rules	
Cease to pump	<p>Pumping is not permitted from natural pools when the water level in the pool is lower than its full capacity.</p> <p><b>Note:</b> 'Full capacity' can be approximated by the pool water level at the point where there is no visible flow into and out of that pool.</p> <p><b>Note:</b> Natural pools include in-river pools found within the channels of rivers and creeks and off-river pools located on flood runners, floodplains and effluents e.g. lakes, lagoons and billabongs.</p> <p><b>Note:</b> For pump sites not within a natural pool, the cease to pump rule is when there is no visible flow at that pump site.</p>
Reference point	Individual natural pool

**Notes:** These access rules do not apply:

1. if the existing *Water Act 1912* entitlement had more stringent access licence conditions. These existing conditions will be carried forward under the plan and are included in appendix 2.
2. to major water utility, local water utility or unregulated river (town water supply) access licences
3. to water taken for domestic consumption by stock and domestic access licences
4. to water taken from existing dams. Any existing licence conditions associated with a dam will be carried forward under the plan.

## Trading Rules

Trade Rules	
<b>Into</b> water source	Not permitted.
<b>Within</b> water source	Trades permitted within water source, subject to assessment.
