

## Rules summary sheet Culgoa River water source

<b>Water sharing plan</b>	Intersecting Streams Unregulated and Alluvial Water Sources
<b>Plan commencement date</b>	14 November 2011
<b>Term of the plan</b>	10 years

### Rules summary

The following rules are a guide only. For more information about your actual licence conditions please call the NSW Office of Water, Dubbo on (02) 6884 2560.

### Access rules

<b>Cease to pump</b>	Pumping is only permitted when a flow is visible.
<b>Reference point</b>	At water supply work (pump, diversion pipe, etc.).

### Trading rules

<b>INTO water source</b>	Not permitted.
<b>WITHIN water source</b>	Trades permitted, subject to assessment.
<b>INTERSTATE trades</b>	The plan may be amended to allow interstate trading in line with an Inter Governmental Agreement should such an agreement be negotiated during the life of the plan.

For more information about the Water Sharing Plan for the Intersecting Streams Unregulated and Alluvial Water Sources refer to the NSW Office of Water website [www.water.nsw.gov.au](http://www.water.nsw.gov.au).

## Rules summary sheet Narran River water source

<b>Water sharing plan</b>	Intersecting Streams Unregulated and Alluvial Water Sources
<b>Plan commencement date</b>	14 November 2011
<b>Term of the plan</b>	10 years

### Rules summary

The following rules are a guide only. For more information about your actual licence conditions please call the NSW Office of Water, Dubbo on (02) 6884 2560.

#### Access rules for management zone 1 (Narran River from Queensland border to New Angledool Gauge No. 2)

<b>Cease to pump</b>	Pumping is only permitted at or above 0.45 m or an equivalent flow of 170 megalitres a day.
<b>Reference point</b>	Narran River at New Angledool Gauge No. 2 (422030).

#### Access rules for management zone 2 (Narran River from New Angledool Gauge No. 2 to Wilby Wilby Gauge)

<b>Cease to pump</b>	Pumping is only permitted at or above 1.18 m or an equivalent flow of 80 megalitres a day.
<b>Reference point</b>	Wilby Wilby (Belvedere) Gauge (422016).

#### Access rules for management zone 3 (Narran River from Wilby Wilby Gauge to Narran Park Gauge)

<b>Cease to pump</b>	Pumping is only permitted when a flow is visible.
<b>Reference point</b>	Narran Park Gauge (422029).

### Trading rules

<b>INTO water source</b>	Not permitted.
<b>WITHIN water source</b>	Trades permitted, subject to assessment.
<b>INTERSTATE trades</b>	The plan may be amended to allow interstate trading in line with an Inter Governmental Agreement should such an agreement be negotiated during the life of the plan.

For more information about the Water Sharing Plan for the Intersecting Streams Unregulated and Alluvial Water Sources go to the NSW Office of Water website [www.water.nsw.gov.au](http://www.water.nsw.gov.au).

## Rules summary sheet Paroo Alluvial Groundwater Source

<b>Water sharing plan</b>	Intersecting Streams Unregulated and Alluvial Water Sources
<b>Plan commencement date</b>	14 November 2011
<b>Term of the plan</b>	10 years

### Rules summary

The following rules are a guide only. For more information about your actual licence conditions please call the NSW Office of Water, Dubbo on (02) 6884 2560.

### Rules for water supply works approvals

<b>To minimise interference between neighbouring water supply works</b>	<p>No water supply works (bores) to be granted or amended within the following distances of existing bores:</p> <ul style="list-style-type: none"> <li>• 200 metres from an aquifer access licence bore on another landholding</li> <li>• 200 metres from a basic landholder rights bore on another landholding</li> <li>• 100 metres from a property boundary</li> <li>• 500 metres from a local or major water utility access licence bore</li> <li>• 100 metres from an Office of Water monitoring bore.</li> </ul> <p>The plan lists circumstances in which these distance conditions may be varied.</p>
<b>To protect bores located near sensitive environmental areas</b>	<p>No water supply works (bores) within the following distances of high priority groundwater dependent ecosystems (GDE) listed in the plan:</p> <ul style="list-style-type: none"> <li>• 2,000 metres</li> <li>• a distance of greater than 2,000 metres if the bore is likely to cause drawdown at the perimeter of any GDE system</li> <li>• 40 metres from the top of the high bank of a river or stream.</li> </ul> <p>The plan lists circumstances in which these distance conditions may be varied and exemptions from these rules.</p>
<b>To protect bores located near contamination sources</b>	<p>No water supply works (bores) to be granted or amended within:</p> <ul style="list-style-type: none"> <li>• 250 metres of a contamination source as identified within the plan;</li> <li>• between 250 metres and 500 metres of a contamination source as identified within the plan unless no drawdown of water will occur within 250 metres of the contamination source</li> <li>• a distance greater than 500 metres of a contamination source as identified within the plan if necessary to protect the water source, the environment or public health or safety.</li> </ul> <p>The plan lists circumstances in which these distance conditions may be varied and exemptions from these rules.</p>

<b>To protect groundwater dependent culturally significant sites</b>	<p>No water supply works (bores) to be granted or amended within the following distances of groundwater dependent cultural significant sites:</p> <ul style="list-style-type: none"> <li>• 100 metres for basic landholder rights bores</li> <li>• 200 metres for bores not used solely for extracting basic landholder rights</li> </ul> <p>The plan lists circumstances in which these distance conditions may be varied and exemptions from these rules</p>
<b>To manage the use of existing bores within restricted distances</b>	<p>Existing water supply works (bores) can continue extraction of groundwater (up to maximum allowed from that bore at the start of the plan) within any of the distance restrictions listed above.</p>
<b>To manage local impacts</b>	<p>The Minister may prohibit or restrict the taking of water from a water source in order to manage local impacts in groundwater sources, where required to:</p> <ul style="list-style-type: none"> <li>• maintain or protect water levels in an aquifer</li> <li>• maintain, protect or improve the quality of water in an aquifer</li> <li>• prevent land subsidence or compaction in an aquifer</li> <li>• to protect groundwater-dependent ecosystems</li> <li>• to maintain pressure, or to ensure pressure recovery, in an aquifer.</li> </ul>
<b>Granting access licences</b>	
<b>Granting access licences</b>	<p><b>May be considered for the following:</b></p> <ul style="list-style-type: none"> <li>• local water utility, major water utility, domestic and stock and town water supply</li> </ul> <p>These are specific purpose access licences in clause 19 of the <i>Water Management (General) Regulation 2011</i>.</p> <ul style="list-style-type: none"> <li>• aquifer (Aboriginal cultural), up to 10 megalitres a year</li> </ul> <p>Granting of water access licences may also be considered as part of a controlled allocation order made in relation to any unassigned water in this water source.</p> <p><b>Note.</b> Prior to any controlled allocation being made there must be consideration of maximum volumes representing the total share components of access licences in the water source, future priority requirements, including basic landholder rights and specific purpose access licences and exemptions that do not require an access licence.</p>
<b>Limits to the availability of water</b>	
<b>Available water determinations (AWDs)</b>	<ul style="list-style-type: none"> <li>• 100 per cent for stock and domestic, local and major water utilities and specific purpose access licences</li> <li>• 1 megalitre per unit share for aquifer access licences</li> </ul> <p><i>AWD for aquifer access licences may be reduced in response to a growth in use.</i></p>
<b>Trading Rules</b>	
<b>INTO water source</b>	Not permitted.
<b>WITHIN water source</b>	Trades permitted, subject to assessment.
<b>INTERSTATE trades</b>	The plan may be amended to allow interstate trading in line with an Inter Governmental Agreement should such an agreement be negotiated during the life of the plan.

<b>Account management rules</b>	
<b>Accounting period</b>	One year
<b>Carryover</b>	None.
<b>Individual account usage</b>	The maximum amount of water permitted to be taken in any one water year is the water allocation accrued in the water access licence account for that water year, adjusted for allocation assignments out of or into individual accounts.

**For more information** about the Water Sharing Plan for the Intersecting Streams Unregulated and Alluvial Water Sources go to the NSW Office of Water website [www.water.nsw.gov.au](http://www.water.nsw.gov.au).
