

## Rules summary sheet: Bakers Creek Water Source

### *Water Sharing Plan for the Gwydir Unregulated River Water Sources 2012*

#### Plan details

<b>Water sharing plan</b>	Gwydir Unregulated River Water Sources 2012
<b>Plan commencement</b>	3 August 2012
<b>Term of the plan</b>	10 years

**Important:** This factsheet summarises the rules contained in the *Water Sharing Plan for the Gwydir Unregulated River Water Sources 2012*. It is intended as a guide only. Approvals and licences also contain conditions that holders must comply with. You can access this information from your 'Statement of Approval' or 'Statement of Conditions' or alternatively via <https://waterregister.waternsw.com.au/water-register-frame>.

#### Access Rules

##### Access rules for rivers and creeks

Cease to pump	<p>Pumping is not permitted from natural pools when the water level in the pool is lower than its full capacity.</p> <p><b>Note:</b> 'Full capacity' can be approximated by the pool water level at the point where there is no visible flow into and out of that pool.</p> <p><b>Note:</b> Natural pools include in-river pools found within the channels of rivers and creeks and off-river pools located on flood runners, floodplains and effluents e.g. lakes, lagoons and billabongs.</p> <p><b>Note:</b> For pump sites not within an in-river pool, the cease to pump rule is when there is no visible flow at that pump site.</p>
Reference point	Individual natural pool

##### Access rules for natural off-river pools

Cease to pump	<p>Pumping is not permitted when the water level in the pool where the water is being taken from is lower than its full capacity.</p> <p><b>Note:</b> 'Full capacity' can be approximated by the pool water level at the point where there is no visible flow into and out of that pool.</p> <p><b>Note:</b> Off-river pools include those natural pools located on flood runners or floodplains, or an effluent that only commences to flow during high flows</p>
Reference point	Individual off-river pool

## Notes:

1. These access rules do not apply if the existing *Water Act 1912* entitlement had more stringent access licence conditions. These existing conditions will be carried forward under the plan and are included in clause 43(6) and the associated Appendix 4.
2. These access rules do not apply to:
  - Local Water Utilities or unregulated (town water supply) access licences
  - Stock and Domestic (Domestic) licences
  - Water taken from run-off harvesting dams or in-river dams
  - Water taken under a licence listed under clause 43(13) and the associated Schedule 3

## Trading rules

Trade type	Rules
Into water source	Not permitted
Within water source	Trades are permitted, subject to assessment

## Rules summary sheet: Gingham Watercourse Water Source

### *Water Sharing Plan for the Gwydir Unregulated River Water Sources 2012*

#### Plan details

<b>Water sharing plan</b>	Gwydir Unregulated River Water Sources 2012
<b>Plan commencement</b>	3 August 2012
<b>Term of the plan</b>	10 years

**Important:** This factsheet summarises the rules contained in the *Water Sharing Plan for the Gwydir Unregulated River Water Sources 2012*. It is intended as a guide only. Approvals and licences also contain conditions that holders must comply with. You can access this information from your 'Statement of Approval' or 'Statement of Conditions' or alternatively via <https://waterregister.waternsw.com.au/water-register-frame>.

#### Access Rules

Upper Gingham Watercourse management zone		
Cease to pump	Very Low Flow Class	Users must cease to pump when the flow at the reference point is less than or equal to 250 ML/day.
	A Class	Users can commence to pump when the flow at the reference point is more than 250 ML/day.
Reference point	Gingham Channel at Tillaloo gauge (418076)	
Active Management		
Unregulated River Access Licences	<p>Access rules are in place to protect held environment water in this management zone.</p> <p>Take of water may be prohibited or adjustments made to flow class announcements, to protect the active environmental water moving through the management zone, in accordance with the Active Management Procedures Manual.</p> <p>Announcements describing the temporary access conditions will be made by the Minister and published on the Water NSW website.</p> <p><b>Note:</b> Active management rules will be in force from 1 December 2020</p>	
Lower Gingham Watercourse management zone		

Cease to pump	Very Low Flow Class	Users must cease to pump when the flow at the reference point is less than 175 ML/day at the Gingham Bridge gauge (418079) within the previous 12 months, or less than 4000 ML/year at the Gingham Bridge gauge over the previous 12 months, or no visible flow in the Gingham Watercourse at the Morialta Road Crossing
	A Class	Users can commence to pump when the flow at the reference point is equal to or more than 175 ML/day at the Gingham Bridge gauge within the previous 12 months, and equal to or more than 4000 ML/year at the Gingham Bridge gauge over the previous 12 months, and a visible flow in the Gingham Watercourse at the Morialta Road Crossing
Reference point	Gingham channel at Gingham Bridge gauge (418079) and Gingham Watercourse at Morialta Road	

## Active Management

Unregulated River Access Licences	<p>Access rules are in place to protect held environment water in this management zone.</p> <p>Take of water may be prohibited or adjustments made to flow class announcements, to protect the active environmental water moving through the management zone, in accordance with the Active Management Procedures Manual.</p> <p>Announcements describing the temporary access conditions will be made by the Minister and published on the Water NSW website.</p> <p><b>Note:</b> Active management rules will be in force from 1 December 2020</p>
-----------------------------------	--

## Access rules for natural off-river pools

Cease to pump	<p>Pumping is not permitted when the water level in the pool where the water is being taken from is lower than its full capacity.</p> <p><b>Note:</b> 'Full capacity' can be approximated by the pool water level at the point where there is no visible flow into and out of that pool.</p> <p><b>Note:</b> Off-river pools include those natural pools located on flood runners or floodplains, or an effluent that only commences to flow during high flows</p>
Reference point	Individual off-river pool

## Notes:

1. These access rules do not apply if the existing *Water Act 1912* entitlement had more stringent access licence conditions. These existing conditions will be carried forward under the plan and are included in clause 43(6) and the associated Appendix 4.
2. These access rules do not apply to:
  - Local Water Utilities or unregulated (town water supply) access licences
  - Stock and Domestic (Domestic) licences
  - Water taken from run-off harvesting dams or in-river dams
  - Water taken under a licence listed under clause 43(13) and the associated Schedule 3

## Trading rules

Upper Gingham Watercourse Water Source management zone	
Into management zone	Not permitted
Within management zone	Trades are permitted, subject to assessment

  

Lower Gingham Watercourse Water Source management zone	
Into management zone	Not permitted
Within management zone	Trades are permitted, subject to assessment

## Rules summary sheet: Gwydir Water Source

### *Water Sharing Plan for the Gwydir Unregulated River Water Sources 2012*

#### Plan details

<b>Water sharing plan</b>	Gwydir Unregulated River Water Sources 2012
<b>Plan commencement</b>	3 August 2012
<b>Term of the plan</b>	10 years

**Important:** This factsheet summarises the rules contained in the *Water Sharing Plan for the Gwydir Unregulated River Water Sources 2012*. It is intended as a guide only. Approvals and licences also contain conditions that holders must comply with. You can access this information from your 'Statement of Approval' or 'Statement of Conditions' or alternatively via <https://waterregister.waternsw.com.au/water-register-frame>.

#### Access Rules

Access rules for rivers and creeks		
Cease to pump	Very Low Flow Class	Users must cease to pump when the flow at the reference point is less than or equal to 250 ML/day.
	A Class	Users can commence to pump when the flow at the reference point is more than 250 ML/day.
Reference point	Gwydir River at Millewa gauge (418066)	
Access rules for natural off-river pools		
Cease to pump	Pumping is not permitted when the water level in the pool where the water is being taken from is lower than its full capacity. <b>Note:</b> 'Full capacity' can be approximated by the pool water level at the point where there is no visible flow into and out of that pool. <b>Note:</b> Off-river pools include those natural pools located on flood runners or floodplains, or an effluent that only commences to flow during high flows	
Reference point	Individual off-river pool	

## Notes:

1. These access rules do not apply if the existing *Water Act 1912* entitlement had more stringent access licence conditions. These existing conditions will be carried forward under the plan and are included in clause 43(6) and the associated Appendix 4.
2. These access rules do not apply to:
  - Local Water Utilities or unregulated (town water supply) access licences
  - Stock and Domestic (Domestic) licences
  - Water taken from run-off harvesting dams or in-river dams
  - Water taken under a licence listed under clause 43(13) and the associated Schedule 3

## Trading rules

Trade type	Rules
Into water source	Not permitted
Within water source	Trades are permitted, subject to assessment

## Rules summary sheet: Mosquito Creek Water Source

### *Water Sharing Plan for the Gwydir Unregulated River Water Sources 2012*

#### Plan details

<b>Water sharing plan</b>	Gwydir Unregulated River Water Sources 2012
<b>Plan commencement</b>	3 August 2012
<b>Term of the plan</b>	10 years

**Important:** This factsheet summarises the rules contained in the *Water Sharing Plan for the Gwydir Unregulated River Water Sources 2012*. It is intended as a guide only. Approvals and licences also contain conditions that holders must comply with. You can access this information from your 'Statement of Approval' or 'Statement of Conditions' or alternatively via <https://waterregister.waternsw.com.au/water-register-frame>.

#### Access Rules

##### Access rules for rivers and creeks

Cease to pump	<p>Pumping is not permitted from natural pools when the water level in the pool is lower than its full capacity.</p> <p><b>Note:</b> 'Full capacity' can be approximated by the pool water level at the point where there is no visible flow into and out of that pool.</p> <p><b>Note:</b> Natural pools include in-river pools found within the channels of rivers and creeks and off-river pools located on flood runners, floodplains and effluents e.g. lakes, lagoons and billabongs.</p> <p><b>Note:</b> For pump sites not within a natural pool, the cease to pump rule is when there is no visible flow at that pump site.</p>
Reference point	Individual natural pool

##### Access rules for natural off-river pools

Cease to pump	<p>Pumping is not permitted when the water level in the pool where the water is being taken from is lower than its full capacity.</p> <p><b>Note:</b> 'Full capacity' can be approximated by the pool water level at the point where there is no visible flow into and out of that pool.</p> <p><b>Note:</b> Off-river pools include those natural pools located on flood runners or floodplains, or an effluent that only commences to flow during high flows</p>
Reference point	Individual off-river pool

## Notes:

1. These access rules do not apply if the existing *Water Act 1912* entitlement had more stringent access licence conditions. These existing conditions will be carried forward under the plan and are included in clause 43(6) and the associated Appendix 4.
2. These access rules do not apply to:
  - Local Water Utilities or unregulated (town water supply) access licences
  - Stock and Domestic (Domestic) licences
  - Water taken from run-off harvesting dams or in-river dams
  - Water taken under a licence listed under clause 43(13) and the associated Schedule 3

## Trading rules

Trade type	Rules
Into water source	Not permitted
Within water source	Trades are permitted, subject to assessment

<b>Term of the plan</b>	10 years

**Important:** This factsheet summarises the rules contained in the *Water Sharing Plan for the Gwydir Unregulated River Water Sources 2012*. It is intended as a guide only. Approvals and licences also contain conditions that holders must comply with. You can access this information from your 'Statement of Approval' or 'Statement of Conditions' or alternatively via <https://waterregister.waternsw.com.au/water-register-frame>.

#### Access Rules

##### Access rules for rivers and creeks

Cease to pump	<p>Pumping is not permitted from natural pools when the water level in the pool is lower than its full capacity.</p> <p><b>Note:</b> 'Full capacity' can be approximated by the pool water level at the point where there is no visible flow into and out of that pool.</p> <p><b>Note:</b> Natural pools include in-river pools found within the channels of rivers and creeks and off-river pools located on flood runners, floodplains and effluents e.g. lakes, lagoons and billabongs.</p> <p><b>Note:</b> For pump sites not within a natural pool, the cease to pump rule is when there is no visible flow at that pump site.</p>
Reference point	Individual natural pool

##### Access rules for natural off-river pools

Cease to pump	<p>Pumping is not permitted when the water level in the pool where the water is being taken from is lower than its full capacity.</p> <p><b>Note:</b> 'Full capacity' can be approximated by the pool water level at the point where there is no visible flow into and out of that pool.</p> <p><b>Note:</b> Off-river pools include those natural pools located on flood runners or floodplains, or an effluent that only commences to flow during high flows</p>
Reference point	Individual off-river pool

## Notes:

1. These access rules do not apply if the existing *Water Act 1912* entitlement had more stringent access licence conditions. These existing conditions will be carried forward under the plan and are included in clause 43(6) and the associated Appendix 4.
2. These access rules do not apply to:
  - Local Water Utilities or unregulated (town water supply) access licences
  - Stock and Domestic (Domestic) licences
  - Water taken from run-off harvesting dams or in-river dams
  - Water taken under a licence listed under clause 43(13) and the associated Schedule 3

## Trading rules

Trade type	Rules
Into water source	Not permitted
Within water source	Trades are permitted, subject to assessment
