upload a  
document: As holders of water rights that fall under the criteria of requiring a meter I am writing to express my dire opposition of the privately-owned meter system. Currently we have had installed as required by the pilot program meters that were prescribed by WaterNSW, there is no way that we should be taking responsibility for the maintenance or the ownership of these meters. There are numerous reasons that the proposal will not work and the burden should not fall on landholders to maintain and install meters required by DOI Water. Specialist repair and maintenance services for the meters are virtually non-existent. This poses a problem not only in repairing a faulty meter in a timely matter, but in cost to the water holder. The vast majority of water holders will be in areas that are not located in an easy accessible area to have immediate support which directly affects their ability to have accesses in critical times to water orders. To ensure a transparent and well maintained system that monitors extractions accurately the onus must not fall on landholders to maintain and service meters that they did not install.
