

Rules and Assessment Criteria Summary Sheet Gwydir Management Zone D (MZ D)

Floodplain Management Plan	Gwydir Valley
Plan commencement	12 August 2016
Term of the plan	10 years

Rules summary

The following rules are a guide only. For more information about the application process please call WaterNSW on 1800 353 104.

Stock Refuges

1. A flood work approval must not be granted or amended to authorise the construction or modification of a stock refuge in MZ D unless, in the Minister's opinion, the stock refuge is or is proposed to be:
- no more than 10 ha within any single location with MZ D, and
 - no more than 5% of the total area of the landholding.

Infrastructure Protection Works (IPW)

2. A flood work approval must not be granted or amended to authorise the construction or modification of an infrastructure protection work in MZ D unless, in the Minister's opinion, the infrastructure protection work is or is proposed to be constructed:
- so that the area enclosed by the infrastructure protection work accounts for no more than 10% of the total area of the landholding on a landholding of less than or equal to 20 ha in area in MZ D, or
 - so that the area enclosed by the infrastructure protection work accounts for no more than the greater of 2 ha or 1% of the total area of the landholding on a landholding of greater than 20 ha in area in MZ D, and
 - so that the area enclosed by the infrastructure protection work will block no more than 5% of the width of MZ D at the location of the works.

Existing flood structures and works

3. A flood work approval must not be granted to authorise an existing unlicensed work in MZ D, unless in the Minister's opinion, the existing unlicensed work:
- was constructed prior to the commencement of the Lower Gingham Floodplain Management Plan and is for an access road, or
 - was constructed as at the date of commencement of this Plan, and is for a stock refuge, or an infrastructure protection work, and
 - as at the date of application, the flood structure is not the subject of:
 - i) an undetermined controlled work application under Part 8 of the *Water Act 1912*, or
 - ii) a previously refused Part 8 application of the *Water Act 1912*, or
 - iii) an undetermined flood work application under the *Water Management Act 2000*, or
 - iv) a previously refused flood work application under the *Water Management Act 2000*, and
 - is assessed against the assessment criteria for MZ D.
4. A flood work approval must not be granted to authorise the amendment of an existing licensed work in MZ D so that it does not comply with the rules of MZ D, unless in the Minister's opinion, the existing licensed work:
- was constructed as at the date of the commencement of this Plan, and
 - the proposed modification of the flood work will reduce the impact of the works on flow patterns (distribution of flows, drainage, depth or velocity) in MZ D, and
 - is assessed against the assessment criteria for MZ D.

Assessment Criteria summary

Flood work applications in MZ D must be assessed against the following assessment criteria.

These assessment criteria are a guide only. For more information about the application process please WaterNSW on 1800 353 104.

Ecological and Cultural Impacts

1. A flood work approval must not be granted or amended to authorise the construction or modification of a flood work unless, in the Minister's opinion the flood work will be constructed to maintain adequate flood connectivity to ecological and/or cultural assets, and to facilitate fish passage, under a range of flood scenarios, including at a minimum, scenarios for the 2004 and 2012 design floods.

2. A flood work approval must not be granted or amended to authorise the construction or modification of a flood work unless, in the Minister's opinion the construction of the flood work is not likely to disturb the ground surface of a heritage site or cause more than minimal erosion to a heritage site.

Drainage Impacts

3. A flood work approval must not be granted or amended to authorise the construction or modification of a flood work unless, in the Minister's opinion the flood work will be constructed to maintain adequate drainage on adjacent landholdings and other landholdings that may be affected by the proposed flood work.

Hydraulic Cumulative Impacts

4. A flood work approval must not be granted or amended to authorise the construction of a flood work in MZ D unless, the Minister has considered the cumulative impact of the proposed flood work and other existing works on the landholding may have on adjacent landholdings, other landholdings and the floodplain environment.
