This issue is of the up most importance to Australia, Australians and their future, The current situation that of The Darling River and Menindee Lakes is paramount as to what the government is currently doing and are responsible for. Being a sleep at the wheel has now put some of the Darling River under huge stress and the mismanagement of The Lower Darling Basin has triggered an unwanted pipeline to my home town. These choices of allocating water to irrigation farms instead of environmental decrement has now put the government in this situation. Poor management is now having a great affect on The Darling River and Menindee Lakes via money and greed. The environment should not suffer to us as a race, especially if it involves fresh water and for the health of our environment. I am thankful that the disallowance of the MDBA Plan, It means that the people of Australia want healthy rivers. Taking more water out of the Murray Darling Basin is madness and self serving to those who only benefit from a political stance. The environment is more important than any political party or irrigation farm, favouring these to manipulate fresh water out of The Lower Darling Basin is criminal.
