Are you an individual or representing an organisation?	Individual
Proposed changes to recording and reporting requirements	
The draft public exhibition regulation includes proposed changes to the recording and reporting mandatory conditions. Do you have any comments on the recording and reporting requirements?	Yes
If yes, please include your comment below and indicate whether it relates to works	B. required to have a meter and data logger but not telemetry - new mandatory condition clause 244A of the regulations
Please provide your comments on the proposed recording and reporting requirements	With regard to irrigationbores requiring a data logger. There should be no requirement for reporting. The meter reader should be able to access all the information on his visit. In explanation we have 4 small irrigation bores which will be required to be fitted with data loggers. So far no one has been able to tell us how to read the meters. I suggest it is not suitable for the farmers to read the meters & should be left to the meter reader at his visit.
Draft public exhibition regulation	
Do you have any other comments on the draft public exhibition regulation?	Yes
	In regard to domestic & stock water bores not requiring meters. I am not sure if reporting is required for these bores. It should not

If yes, please provide your comments.

be required. E G .my family have 6 bores in a rural situation, supplying houses, lived in or owned by them,& their stock. This for adjoining or nearby properties all operating with the one PIC. Reporting would be a nightmare.
